Exam Questions Education-Cloud-Consultant

Salesforce Certified Education Cloud Consultant Exam

About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

A college is experiencing a disconnect between the Advancement and Finance departments which causes a delay in the allocation of donations. The college wants to synchronize fundraising data between these two offices.

Which solution should a consultant recommend?

- A. Financial Services Cloud
- B. Payment Services
- C. Accounting Subledger

Answer: C

Explanation:

Accounting Subledger is a solution that allows education institutions to synchronize fundraising data between Advancement and Finance departments. It enables them to create accounting-ready summaries of donations and other transactions from Salesforce and export them to their accounting systems¹. This solution can help the college avoid manual data entry, reduce errors, and streamline the allocation of donations. References: Salesforce Education Cloud Academy: Consultant Fundamentals, [Accounting Subledger Overview]

NEW QUESTION 2

A private school's advancement office is looking for a fundraising solution that will create giving pages, process online donations and easily integrate with Salesforce.

Which solution should the consultant recommend?

- A. Pathways
- B. Experience Cloud
- C. Elevate
- D. Accounting Subledger

Answer: C

Explanation:

Elevate is a suite of products that helps nonprofits and educational institutions with online fundraising, payment processing, and accounting reconciliation. Elevate includes Giving Pages, Payment Services, and Accounting Subledger. Giving Pages allows organizations to create branded, mobile-friendly donation forms that can be embedded on websites or shared through email and social media. Payment Services enables secure and flexible payment processing for online donations, recurring gifts, and pledges. Accounting Subledger simplifies the process of reconciling donations and payments with the general ledger, and supports multiple currencies and tax regulations. References:

? [Salesforce.org Elevate Overview](#)

? [Salesforce.org Elevate Data Sheet](#)

? [Prepare for Your Salesforce Education Cloud Consultant Credential](#)

NEW QUESTION 3

A higher education institution has used Salesforce for many years and has Person Accounts enabled. The institution wants to install the Education Data Architecture (EDA) in its existing Salesforce environment.

Which consideration should the consultant discuss with the institution?

- A. Person Accounts are unsupported in EDA.
- B. A support ticket is required to disable Person Accounts.
- C. Person Accounts can only be merged with Administrative Accounts.

Answer: A

Explanation:

In Education Cloud, data about individual people, such as students, faculty, alumni, and external contacts, are saved on the Account object as Person Accounts. However, when it comes to EDA, Person Accounts are not supported because EDA uses a different account model designed to accommodate the complex relationships and affiliations unique to educational institutions². It's important to discuss with the institution that if they want to use EDA, they will need to consider how to handle existing Person Accounts, as they would need to transition to the EDA account model, which does not support Person Accounts directly¹.

NEW QUESTION 4

A school district is reopening after global pandemic. It has an existing Salesforce org configured with the K-12 Architecture kit. The school district wants to leverage Work.com Command Center for schools in its existing org.

What should the consultant advise?

- A. Work.com Command Center operates in a separate org.
- B. Install Work.com Command Center in existing org.
- C. Leverage Student Success Hub.
- D. Use third-party app from AppExchange.

Answer: B

Explanation:

The consultant should advise the school district to install Work.com Command Center in their existing org, because this can help them leverage Work.com Command Center for schools in their existing org. Work.com Command Center is a solution that helps organizations manage their reopening and recovery efforts after a global pandemic. Work.com Command Center for schools is a specific configuration of Work.com Command Center that helps schools monitor student and staff wellness, attendance, and engagement. Work.com Command Center can be installed in an existing org as a managed package from the AppExchange. Work.com Command Center does not operate in a separate org, nor does it require leveraging Student Success Hub or using a third-party app from AppExchange. References:

? <https://www.salesforce.org/workdotcom/>

? <https://www.salesforce.org/wp-content/uploads/2020/08/WorkDotCom-for-Schools.pdf>

? <https://appexchange.salesforce.com/appxListingDetail?listingId=a0N3A00000FMkZCUA1>

NEW QUESTION 5

What should a consultant recommend to a university that wants a successful Data Governance committee?

- A. Create a Center of Excellence queue.
- B. Set up a Salesforce Adoption Dashboard.
- C. Refer committee members to Trailhead.
- D. Use RACI matrix to define member roles.

Answer: D

Explanation:

The consultant should recommend to use a RACI matrix to define member roles for a university that wants a successful Data Governance committee. A RACI matrix is a tool that clarifies the roles and responsibilities of different stakeholders in a project or a process, using four categories: Responsible, Accountable, Consulted, and Informed. A RACI matrix can help the university have a successful Data Governance committee by defining and communicating who is responsible for making decisions, who is accountable for ensuring quality and compliance, who is consulted for providing input or feedback, and who is informed about the outcomes or changes related to data governance. Creating a Center of Excellence queue, setting up a Salesforce Adoption Dashboard, or referring committee members to Trailhead are not recommendations for a university that wants a successful Data Governance committee. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

? <https://trailhead.salesforce.com/en/content/learn/modules/project-management-basics/project-management-basics-raci>

NEW QUESTION 6

A university is working with a consultant to install and configure the Education Data Architecture (EDA). The university uses the Default Account Model. The university wants accounts to include the first and last name of each contact at the time the contact is created.

Which action should the consultant take in EDA Settings to meet this requirement?

- A. Select the Run Backfill button.
- B. Edit Administrative Account Name Format.
- C. Set the Account Model to Household.

Answer: B

Explanation:

The Default Account Model in EDA creates one account for each contact and names it after the contact's full name. However, if the contact's name changes, the account name does not update automatically. To meet the requirement of including the first and last name of each contact at the time the contact is created, the consultant should edit the Administrative Account Name Format in EDA Settings. This allows the consultant to define a custom formula for naming accounts based on contact fields. For example, the formula could be FirstName & " " & LastName. References: [Salesforce Education Cloud Academy: Consultant Fundamentals], [EDA Account Naming]

NEW QUESTION 7

The director of graduate recruitment is interested in Education Cloud. Recruitment staff need to access Opportunity and Campaign Member information about students. The IT director is concerned about cost and suggests using other license types for recruitment users.

What should the consultant discuss with the client?

- A. Unlimited Edition requires a full Salesforce license.
- B. Education Data Architecture requires a Community license.
- C. The business user case requires a Lightning Platform Plus license.
- D. The business user case requires a full Salesforce license.

Answer: D

Explanation:

The consultant should discuss with the client that the business user case requires a full Salesforce license, not other license types. A full Salesforce license allows users to access standard CRM functionality, such as Accounts, Contacts, Opportunities, and Campaigns. This is what the recruitment staff need to access Opportunity and Campaign Member information about students. Other license types, such as Lightning Platform or Community licenses, have limited access to CRM functionality and may not meet the business user case. References:

? https://help.salesforce.com/s/articleView?id=sf.users_license_types_available.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/identity_basics/identity_basics_licenses

NEW QUESTION 8

A university's IT department is setting up an integration between the student information system (SIS) and the Education Data Architecture (EDA). The SIS integration will send students' academic major, status, and dates.

Which Salesforce object should this be mapped to?

- A. Course Connection
- B. Education History
- C. A Program Enrollment

Answer: C

Explanation:

A Program Enrollment object in EDA is used to track a student's registration in an academic program or course of study, including information such as registration dates, status, credits earned, and GPA1. A Course Connection object is used to track a student's enrollment in a specific course offering, including information such as role, grade, and attendance2. An Education History object is used to track a student's previous education records, such as schools attended, degrees earned, and test scores3. References:

? 1: Education Data Architecture Documentation - Salesforce1

? 2: EDA Object Reference - Salesforce4

? 3: EDA Object Reference - Salesforce4

NEW QUESTION 9

The university advancement team wants the ability to track students' prior and current connections to other schools. Which two objects should the consultant evaluate to connect students to other educational institutions?

- A. Education History and Affiliations
- B. Relationship and Affiliations
- C. Affiliations and Program Plan

Answer: A

Explanation:

The consultant should evaluate the Education History and Affiliations objects to connect students to other educational institutions. Education History tracks the previous or current education of a Contact, such as the school name, degree, and graduation date. Affiliations track the relationship between a Contact and an Account, such as a student and a school. Relationship is an object that tracks the personal or professional connection between two Contacts, not between a Contact and an Account. Program Plan is an object that defines the requirements for completing an academic program, not the connection to a school.

References:

? https://help.salesforce.com/s/articleView?id=sf.ssh_education_history.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.ssh_affiliation.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.ssh_relationship.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.ssh_program_plan.htm&type=5

NEW QUESTION 10

The Advancement office wants to replace its legacy system with Salesforce and has hired a consultant to help build a CRM strategy. Which recommendation should the consultant make to meet this requirement?

- A. Implement Nonprofit Success Pack (NPSP).
- B. Start solution design during a discovery session.
- C. Prioritize the organization's initiatives.

Answer: C

Explanation:

A CRM strategy is a plan that outlines how an organization will use Salesforce to achieve its goals and objectives. A consultant should recommend prioritizing the organization's initiatives as part of the CRM strategy, as this will help align the Salesforce solution with the most important and urgent needs of the Advancement office, such as fundraising, donor engagement, alumni relations, etc. Prioritizing the initiatives will also help define the scope, timeline, and budget of the project, as well as the key stakeholders, success metrics, and risks involved. Implementing Nonprofit Success Pack (NPSP) is a possible solution option, but not a recommendation for the CRM strategy. Starting solution design during a discovery session is a project management best practice, but not a recommendation for the CRM strategy.

NEW QUESTION 10

The Undergraduate Admissions office needs to track new students and their current course of study. Which Education Data Architecture (EDA) object should the consultant use to meet the requirement?

- A. Program Enrollment
- B. Education History
- C. Contact Role

Answer: A

Explanation:

Program Enrollment is an EDA object that tracks the enrollment of a student in a specific program or course of study. It can store information such as the program name, start and end dates, status, and credits earned. The consultant should use this object to meet the requirement of tracking new students and their current course of study for the Undergraduate Admissions office. References: [Salesforce Education Cloud Academy: Consultant Fundamentals], [EDA Data Model]

NEW QUESTION 14

A school is implementing Salesforce with the Education Data Architecture (EDA) to track parents and students in a community. When a contact record is created, a Community user is created leveraging Table-Driven Trigger Management (TDTM). During deployment to production, the consultant notices that only the contact record is created.

Which step should the consultant verify when troubleshooting the issue?

- A. Trigger handlers were loaded into production.
- B. The community was set to Active.
- C. Declarative automations were deployed successfully.

Answer: A

Explanation:

The consultant should verify that trigger handlers were loaded into production when troubleshooting the issue of only the contact record being created when a contact record is created and a Community user is supposed to be created leveraging Table-Driven Trigger Management (TDTM) for the school that is implementing Salesforce with EDA to track parents and students in a community. Trigger handlers are classes that contain the logic for EDA triggers and can be controlled by Trigger Handler records. Trigger handlers need to be loaded into production before deploying declarative customizations or enabling features that depend on them. The consultant should verify that trigger handlers were loaded into production by checking if the EDA_TDTM package was installed or if the Trigger Handler records were created. The community being set to Active or declarative automations being deployed successfully are not steps that the consultant should verify when troubleshooting the issue of only the contact record being created when a contact record is created and a Community user is supposed to be created leveraging TDTM for the school that is implementing Salesforce with EDA to track parents and students in a community. References:

? <https://powerofus.force.com/s/article/EDA-TDTM>

? <https://powerofus.force.com/s/article/EDA-Installation>

NEW QUESTION 17

An institution's office of Career service wants to solution that allows student to schedule appointments with any available counselor directly from a portal. On which object is the availability configured?

- A. Goal Definition
- B. Benefit schedule
- C. Case

Answer: B

Explanation:

- ? Configuring Availability for Appointments:
- ? Setting Up Benefit Schedule:
- ? Integration with Portals:
- ? Training and Adoption: References:
- ? Salesforce Education Cloud Documentation: Benefit Schedule

NEW QUESTION 21

A university's IT department and its consultant are integrating data from the Student Information System (SIS) to the Education Data Architecture (EDA). Advisors need to see a student's primary course of study. Which object in EDA indicate a student's major?

- A. Education History
- B. Relationship
- C. Program Plan Requirement
- D. Program Enrollment

Answer: D

Explanation:

Program Enrollment is an object in EDA that indicates a student's primary course of study or major. Program Enrollment is an object that represents a junction between a Contact and a Program Plan. Program Enrollment can be used to track various information about a student's course of study, such as status, start date, end date, or level. The consultant can create a Program Enrollment record for each student and associate it with their primary course of study or major. Education History, Relationship, and Program Plan Requirement are not objects in EDA that indicate a student's primary course of study or major. References:
? <https://powerofus.force.com/s/article/EDA-Program-Enrollments>
? <https://powerofus.force.com/s/article/EDA-Program-Enrollments>Create>

NEW QUESTION 26

An Admissions office is interested in Admissions Connect to process student applications. Which consideration should the consultant advise?

- A. Admissions Connect requires a third-party app.
- B. Experience Cloud is required.
- C. Application form requires OmniStudio.

Answer: C

Explanation:

The consultant should advise that the application form requires OmniStudio as a consideration when using Admissions Connect to process student applications for the Admissions office. OmniStudio is a product that allows users to create and manage digital experiences for customers or constituents. OmniStudio is required to create and customize the application form in Admissions Connect, which is the online form that applicants use to submit their information and documents for admission. The consultant should advise that the application form requires OmniStudio as a consideration when using Admissions Connect to process student applications for the Admissions office by explaining the benefits and challenges of using OmniStudio for creating and customizing the application form, such as flexibility, functionality, or configuration. Admissions Connect requires a third-party app, Experience Cloud is required, or Application Review requires Tableau CRM are not considerations that the consultant should advise when using Admissions Connect to process student applications for the Admissions office. References:
? <https://www.salesforce.org/products/admissions-connect/overview/>
? <https://www.salesforce.org/wp-content/uploads/2021/06/Salesforce.org-Admissions-Connect-Tableau-Accelerator.pdf>

NEW QUESTION 29

A university wants to track the Biology 101 class for next semester. The class will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A. and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility. Which object in Education Data Architecture (EDA) should a consultant use to meet this requirement?

- A. Course Offering Schedule
- B. Time Block
- C. Program Enrollment

Answer: A

Explanation:

The consultant should use the Course Offering Schedule object in EDA to meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university. The Course Offering Schedule object is an object in EDA that allows users to store information about when and where a course offering is held, such as day of week, start time, end time, or location. The Course Offering Schedule object can help the consultant meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university by creating two Course Offering Schedule records for the Biology 101 course offering, one for the lecture sessions and one for the lab sessions, and specifying the day of week, start time, end time, and location for each record. Time Block, Program Enrollment, or Course Connection are not objects in EDA that the consultant should use to meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university. References:
? <https://powerofus.force.com/s/article/EDA-Course-Offering-Schedules>
? <https://powerofus.force.com/s/article/EDA-Course-Offerings>

NEW QUESTION 31

An Admissions office is interested in using Admissions Connect to manage its student applications and to recede supporting do. How are application documents saved in Admissions Connect?

- A. Salesforce Files
- B. Document Type
- C. Action Plan Item

Answer: A

Explanation:

Application documents are saved as Salesforce Files in Admissions Connect, which are attached to the Application record or the Application Material Mapping record. Document Type is a field on the Application Material Mapping object that defines the type of document required for an application requirement. Action Plan Item is an object that tracks tasks or actions related to an application or enrollment process. References:

? https://help.salesforce.com/s/articleView?id=sf.admissions_connect_files.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.admissions_connect_application_material_mapping.htm&type=5

NEW QUESTION 34

An institution's Office of Career Services wants a solution that allows students to schedule appointments with any available directly from a portal. Which feature should the consultant recommend to meet the requirement?

- A. Email to Case
- B. Success Teams
- C. Advising Pools
- D. Early Alerts

Answer: C

Explanation:

Advising Pools is a feature that allows students to schedule appointments with any available advisor directly from a portal. Advising Pools enables advisors to set their availability and preferences, and students to see which advisors match their needs and book appointments accordingly. Email to Case, Success Teams, and Early Alerts are not features that allow students to schedule appointments with advisors from a portal. References:

? https://help.salesforce.com/s/articleView?id=sf.eda_advising_pools.htm&type=5

? <https://www.salesforce.org/blog/advising-pools-for-higher-ed/>

NEW QUESTION 39

A school district wants a free platform to instruct students on data visualization. Which solution should the consultant recommend?

- A. Tableau CRM
- B. Student Success Hub
- C. Tableau Public
- D. Trailhead

Answer: C

Explanation:

Tableau Public is a solution that the consultant can recommend to meet the requirement of providing a free platform to instruct students on data visualization. Tableau Public is a product that allows users to create and share interactive data visualizations online, using various types of data sources and charts. Tableau Public is free and accessible to anyone who wants to learn data visualization skills and techniques. Tableau CRM, Student Success Hub, and Trailhead are not solutions that can provide a free platform to instruct students on data visualization. References:

? <https://public.tableau.com/en-us/s/>

? <https://www.tableau.com/academic/students>

NEW QUESTION 40

An institution wants to consolidate efforts to track online engagement for its annual Giving Day on Facebook, Twitter, and Instagram. Which solution meets this requirement?

- A. Campaign Influence
- B. Salesforce Inbox
- C. Marketing Cloud

Answer: C

Explanation:

The consultant should recommend Marketing Cloud as a solution to meet the requirement of consolidating efforts to track online engagement for its annual Giving Day on Facebook, Twitter, and Instagram for the institution. Marketing Cloud is a product that allows users to create and manage personalized and targeted marketing campaigns for customers or prospects. Marketing Cloud can help the institution consolidate efforts to track online engagement for its annual Giving Day on Facebook, Twitter, and Instagram by using features such as Social Studio, Social Listening, or Social Analytics. Campaign Influence, Salesforce Inbox, or Pardot are not solutions that can meet the requirement of consolidating efforts to track online engagement for its annual Giving Day on Facebook, Twitter, and Instagram for the institution. References:

? <https://www.salesforce.com/products/marketing-cloud/overview/>

? <https://www.salesforce.com/products/marketing-cloud/social-media-marketing/>

NEW QUESTION 44

A university is planning an enterprise-wide implementation of Education Cloud. It has asked the consultant to do an analysis of Education Cloud functionality to identify additional apps it may need to purchase.

What is a standard feature of Education Cloud?

- A. Student Advising
- B. Event Management
- C. Order Management

Answer: A

Explanation:

? Features of Student Advising:

? Implementation:

References:

? Salesforce Education Cloud Documentation: Student Success Hub

NEW QUESTION 48

A college has a standard Salesforce environment and wants to use Student Success Hub for its undergraduate advising.

What is required to use Student Success Hub?

- A. Education Data Architecture
- B. Customer Community license
- C. Pathways
- D. Field Service

Answer: A

Explanation:

Education Data Architecture (EDA) is required to use Student Success Hub for the college's undergraduate advising. EDA is a product that provides a flexible and scalable data architecture for higher education institutions to manage their student lifecycle. EDA provides objects and features such as Accounts, Contacts, Relationships, Affiliations, Attributes, or Course Connections. Student Success Hub is a solution that extends EDA to meet the needs of student services and support. Student Success Hub provides features such as Early Alerts, Success Plans, Pathways, and Advising Events. Student Success Hub requires EDA to be installed and configured in the Salesforce environment before installing Student Success Hub. A Customer Community license, Pathways, or Field Service are not required to use Student Success Hub for the college's undergraduate advising. References:

? <https://www.salesforce.org/products/education-cloud/overview/>

? <https://www.salesforce.org/products/student-success-hub/overview/>

NEW QUESTION 49

A college needs to extend capabilities of its existing Salesforce environment that uses the Education Data Architecture (EDA). The college want to ensure that any future apps and configurations are compatible and support the Table Driven Trigger Management (TDTM) Functionality.

- A. Use the yaml file from Salesforce.org GitHub.
- B. Use a Salesforce.org community solution.
- C. Use third-party apps that are powered by EDA.
- D. Use third-party apps that are EDA ready.

Answer: D

Explanation:

The consultant should advise the college to use third-party apps that are EDA ready, because this can ensure that any future apps and configurations are compatible and support the Table Driven Trigger Management (TDTM) functionality. EDA ready apps are apps that have been certified by Salesforce.org as compatible with EDA and its features, such as TDTM. TDTM is a feature that allows users to customize the behavior of EDA triggers and disable or enable them as needed. EDA ready apps can help the college extend the capabilities of their existing Salesforce environment without compromising the functionality or performance of EDA. Using the yaml file from Salesforce.org GitHub, using a Salesforce.org community solution, or using third-party apps that are powered by EDA are not advice that the consultant should give to the college. References:

? <https://powerofus.force.com/s/article/EDA-Certified-Apps>

? <https://powerofus.force.com/s/article/EDA-TDTM>

NEW QUESTION 53

What is the correct order of operations to ensure customer success in an Education Cloud implementation?

- A. Document Current State, Conduct Discovery Workshops, Generate Solution Design, Write Test Scripts & Plans, Build Solution & Test, Deploy.
- B. Document Current State, Conduct: Discovery Workshops, Write Test Scripts & Plans, Build Solution & Test, Generate Solution Design, Deploy.
- C. Conduct Discovery Workshops, Document Current State, Generate Solution Design, Write Test Scripts & Plans, Build Solution & Test, Deploy,
- D. Conduct Discovery Workshops, Document Current State, Write Test Scripts Plans, Generate Solution Design, Build Solution & Test, Deploy

Answer: C

Explanation:

The correct order of operations to ensure customer success in an Education Cloud implementation is:

? Conduct Discovery Workshops: This is the first step where the consultant gathers information and requirements from the customer and stakeholders through interviews, surveys, or observations.

? Document Current State: This is the second step where the consultant analyzes and documents the current processes and systems that the customer uses and identifies gaps and opportunities for improvement.

? Generate Solution Design: This is the third step where the consultant creates and presents a solution design document that outlines how Salesforce will meet the customer's requirements and expectations, and defines the scope, timeline, and budget of the project.

? Write Test Scripts & Plans: This is the fourth step where the consultant writes test scripts and plans that describe how to test the functionality and usability of the solution in different scenarios and conditions, and defines the success criteria and exit criteria for testing.

? Build Solution & Test: This is the fifth step where the consultant builds the solution in a sandbox environment using declarative or programmatic tools, and tests the solution using the test scripts and plans to ensure quality and accuracy.

? Deploy: This is the sixth and final step where the consultant deploys the solution into the production environment using change sets or other deployment tools, and provides training and support to the customer and end users.

Documenting Current State, Conducting Discovery Workshops, Writing Test Scripts & Plans, Building Solution & Test, Generating Solution Design, or Deploying are not correct orders of operations to ensure customer success in an Education Cloud implementation. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf
? <https://trailhead.salesforce.com/en/content/learn/modules/project-management-basics>

NEW QUESTION 55

The Registrar's office has limited staff and is interested in a real-time automated Salesforce messaging solution that can address common student questions on deadlines and requirements, and provide links to resources.

Which two options should the consultant recommend to meet the requirement? Choose 2 answers.

- A. Knowledge
- B. Queues
- C. Bots
- D. Live Chat

Answer: CD

Explanation:

Bots and Live Chat are two options that the consultant can recommend to meet the requirement of providing real-time automated Salesforce messaging solution that can address common student questions on deadlines and requirements, and provide links to resources. Bots are automated agents that can interact with customers via text or voice, and provide answers, guidance, or actions based on predefined rules or artificial intelligence. Live Chat is a feature that allows users to chat with customers or prospects in real time from a website or an app, and provide support or information. Bots and Live Chat can be used together to create a seamless customer service experience, where bots can handle simple inquiries and escalate complex cases to live agents. Knowledge and Queues are not options that can provide real-time automated Salesforce messaging solution. References:

? <https://www.salesforce.com/products/service-cloud/features/bots/>
? <https://www.salesforce.com/products/service-cloud/features/live-chat-software/>
? https://trailhead.salesforce.com/en/content/learn/modules/service_bots_basics

NEW QUESTION 60

A university is interested in the Student Success Hub Tableau Accelerator. Which object should the consultant ensure there is data?

- A. Availability Topic
- B. Appointment attendee
- C. Behavior Incident

Answer: B

Explanation:

The consultant should ensure that there is data in the Appointment attendee object for the Student Success Hub Tableau Accelerator, because it tracks the attendance and outcomes of appointments between students and advisors. The Availability Topic object defines the topics that advisors can offer appointments for, but it does not track appointment data. The Behavior Incident object tracks the incidents and interventions related to student behavior, not appointments.

References:

? https://help.salesforce.com/s/articleView?id=sf.ssh_tableau_accelerator.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.ssh_appointment_attendee.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.ssh_availability_topic.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.ssh_behavior_incident.htm&type=5

NEW QUESTION 62

A Career Services department plans to implement Salesforce. The consultant is preparing for the discovery session with the director and advising staff. Which question should the consultant ask during the discovery session?

- A. Which users need system admin access?
- B. What is the estimated project budget?
- C. What are the success metrics for the project?

Answer: C

Explanation:

The consultant should ask about the success metrics for the project to understand the goals and expectations of the Career Services department and how to measure them. This will help the consultant design a solution that aligns with the department's vision and needs. Which users need system admin access and what is the estimated project budget are questions that can be asked later in the project planning or execution phase, not during the discovery session.

References:

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-discovery>
? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-project-planning>

NEW QUESTION 67

A school for continuing education needs to track program costs within its budget and related revenue streams each program brings to the school. Which Salesforce solution should the consultant consider?

- A. Accounting Subledger
- B. Program Management Module
- C. Grants Management

Answer: B

Explanation:

The consultant should consider Program Management Module as a Salesforce solution to track program costs within its budget and related revenue streams each program brings to the school for continuing education. Program Management Module is a product that allows users to manage programs, services, or interventions for their constituents. Program Management Module can help the school for continuing education track program costs within its budget and related revenue streams each program brings to the school by using features such as Programs, Services, Service Deliveries, or Service Reports. The consultant can also leverage other tools such as reports, dashboards, or formulas to track and analyze program costs and revenue streams. Accounting

Subledger, Grants Management, or Marketing Cloud are not Salesforce solutions that can track program costs within its budget and related revenue streams each program brings to the school for the school for continuing education. References:

? <https://www.salesforce.org/products/program-management-module/overview/>

? <https://powerofus.force.com/s/article/PMM-Overview>

NEW QUESTION 69

The IT department at a university is evaluating open source solutions for student recruitment.

Which consideration should the consultant discuss with the department?

- A. The code is updated via Salesforce Releases.
- B. The code is maintained by Salesforce developers.
- C. The code is shared and sourced by the community.

Answer: C

Explanation:

The consideration that the consultant should discuss with the IT department is C. The code is shared and sourced by the community¹. This means that open source solutions for student recruitment are developed and maintained by a network of volunteers, contributors, and users who collaborate and exchange ideas, feedback, and code. The code is publicly available and can be modified, customized, and redistributed by anyone who follows the license terms and conditions².

* A. The code is updated via Salesforce Releases and B. The code is maintained by Salesforce developers are not valid considerations for open source solutions for student recruitment. These statements apply to Salesforce products and features that are built and supported by Salesforce, such as the Education Data Architecture (EDA) or the Higher Education Data Platform (HEDA)³. However, open source solutions are not part of the Salesforce platform and do not depend on Salesforce releases or developers.

NEW QUESTION 73

A school wants to use the K-12 Architecture Kit to track elementary students and their parents. Which consideration about the K-12 Architecture Kit should the consultant discuss with the school?

- A. It requires Experience Cloud.
- B. It is built on the Education Data Architecture.
- C. It is built on Nonprofit Success Pack.

Answer: C

Explanation:

The consultant should discuss with the school that K-12 Architecture Kit is built on Nonprofit Success Pack as a consideration about K-12 Architecture Kit when using it to track elementary students and their parents. K-12 Architecture Kit is a product that provides a flexible and scalable data architecture for K-12 schools to manage their student lifecycle. K-12 Architecture Kit is built on Nonprofit Success Pack, which is a product that provides a data architecture for nonprofit organizations to manage their constituents and donors. K-12 Architecture Kit extends Nonprofit Success Pack by adding objects and features such as Contacts, Accounts, Relationships, Affiliations, Attendance Events, or Behavior Responses. The consultant should discuss with the school that K-12 Architecture Kit is built on Nonprofit Success Pack as a consideration about K-12 Architecture Kit when using it to track elementary students and their parents by explaining the benefits and challenges of using Nonprofit Success Pack for a K-12 school, such as data model, terminology, or configuration. It requires Experience Cloud, it is built on EDA, or it is built on Admissions Connect are not considerations about K-12 Architecture Kit that the consultant should discuss with the school when using it to track elementary students and their parents. References:

? <https://www.salesforce.org/products/k-12-architecture-kit/overview/>

? <https://powerofus.force.com/s/article/K12-Architecture-Kit>

NEW QUESTION 74

A school of engineering is interested in Salesforce. There are several other Salesforce environments across the university with varying degrees of usage and configuration. The university is largely decentralized where schools operate independently of each other and often in silos. There is high turnover in staff and leadership.

Which Salesforce environment strategy should the consultant recommend?

- A. The school of engineering should have its own Salesforce environment.
- B. The university should consolidate all of the Salesforce environments.
- C. The school of engineering should initiate a Center of Excellence (CoE).

Answer: A

Explanation:

The consultant should recommend that the school of engineering should have its own Salesforce environment as a Salesforce environment strategy for the school of engineering that is interested in Salesforce and there are several other Salesforce environments across the university with varying degrees of usage and configuration, the university is largely decentralized where schools operate independently of each other and often in silos, and there is high turnover in staff and leadership. A Salesforce environment is an instance of Salesforce that contains a set of data, metadata, features, or configurations. The school of engineering should have its own Salesforce environment as a Salesforce environment strategy for the school of engineering that is interested in Salesforce and there are several other Salesforce environments across the university with varying degrees of usage and configuration, the university is largely decentralized where schools operate independently of each other and often in silos, and there is high turnover in staff and leadership by having more control, flexibility, and autonomy over their own data, metadata, features, or configurations without being affected by or affecting other schools?? environments. The university should not consolidate all of the Salesforce environments, the school of engineering should not initiate a Center of Excellence (CoE), or the school of engineering should not share an existing Salesforce environment with another school as a Salesforce environment strategy for the school of engineering that is interested in Salesforce and there are several other Salesforce environments across the university with varying degrees of usage and configuration, the university is largely decentralized where schools operate independently of each other and often in silos, and there is high turnover in staff and leadership. References:

? <https://help.salesforce.com/s/articleView?id=sf.environments.htm&type=5>

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

NEW QUESTION 79

Where can a customer access the open-source common sprint project code repositories?

- A. Trailblazer Community

- B. Partner Community
- C. GitHub

Answer: C

Explanation:

GitHub is a web-based platform that hosts open-source code repositories for developers to collaborate on projects¹. Customers can access the common sprint project code repositories on GitHub by visiting the Salesforce.org Open Source Commons organization page². There, they can find various community projects stemming from Salesforce.org Open Source Community Sprints, such as Data Generation Toolkit, Outbound Funds Module, and Membership Schema and Benefits². These projects are compatible with Education Cloud and can be used to extend its functionality and features. References:

? 1: What is GitHub? - GitHub Docs³

? 2: Salesforce.org Open Source Commons - Community Sprint Projects⁴

NEW QUESTION 81

A consultant needs to import a large volume of records into a university's Salesforce production environment that has the Education Data Architecture (EDA). The import file already defines Account and Address information. The university's environment has a private sharing model and several sharing rules. Which of these temporary actions should the consultant take before importing the data?

- A. Disable sharing rules using TDTM.
- B. Change the account model to Household.
- C. Disable unnecessary code using Table-Driven Trigger Management (TDTM).

Answer: C

Explanation:

TDTM is a feature of EDA that allows you to manage the automation and custom logic that runs when data is inserted, updated, or deleted. By disabling unnecessary code, such as trigger handlers or validation rules, you can improve the performance and speed of the data import, avoid errors or unwanted data creation, and reduce the risk of hitting governor limits¹².

Disabling sharing rules using TDTM is not a recommended action, because sharing rules are not controlled by TDTM, but by the Salesforce security model. Sharing rules are used to grant additional access to records based on criteria or ownership. Disabling them may affect the visibility and accessibility of the imported data for the users³⁴.

Changing the account model to Household is not a necessary action, because the account model is a preference that depends on how the university wants to organize its contacts and accounts. EDA supports both the Administrative and Household account models, and the import file already defines the Account information. Changing the account model may cause data loss or duplication, and require additional configuration and mapping⁵.

NEW QUESTION 85

The new director of Admissions plans to use Salesforce for its recruitment and admissions process. The director wants to increase the school's ranking and application yield by 15%.

The President's Office and dean are supportive and ready to launch the project. What should the consultant confirm?

- A. The director has end-user support for the project.
- B. The director has leadership support for the project.
- C. The project has a specific vision.
- D. The project has a measurable goal.

Answer: A

Explanation:

The consultant should confirm that the director has end-user support for the project, because this is a key factor for a successful implementation. End-user support means that the people who will use Salesforce on a daily basis are involved in the project, provide feedback, receive training, and adopt the new system. The other options are already given in the scenario, so they do not need to be confirmed by the consultant. References:

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-basics-key-stakeholders>

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-basics-change-management>

NEW QUESTION 89

Recruiters at an institution are evaluating tools to enhance their email. They want to see when a student has opened an email or clicked on a link. Recruiters also want to insert time slots directly from their calendar into an email and allow students to choose the meeting time.

Which solution should the consultant recommend?

- A. Gmail Integration
- B. Custom automation
- C. Einstein Activity Capture
- D. Salesforce Inbox

Answer: D

Explanation:

Salesforce Inbox is a solution that the consultant can recommend to enhance the email functionality for recruiters. Salesforce Inbox allows recruiters to see when a student has opened an email or clicked on a link, using email tracking features. Salesforce Inbox also allows recruiters to insert time slots directly from their calendar into an email and allow students to choose the meeting time, using meeting scheduling features. Gmail Integration, custom automation, and Einstein Activity Capture are not solutions that can provide the email functionality that recruiters want. References:

? <https://www.salesforce.com/products/sales-cloud/features/salesforce-inbox/>

? https://help.salesforce.com/s/articleView?id=sf.inbox_overview.htm&type=5

NEW QUESTION 91

A university plans to use Salesforce for its recruitment and admissions process and needs to integrate it with the Student Information System (SIS).

Which step should the consultant take initially?

- A. Disable Trigger Handler records.
- B. Define the process.
- C. Use the Data Import Wizard.

Answer: B

Explanation:

The initial step that the consultant should take when planning to integrate Salesforce with the Student Information System (SIS) is B. Define the process¹. This means that the consultant should identify the business requirements, use cases, and scenarios that the integration should support, such as data synchronization, data transformation, data validation, error handling, etc. The consultant should also determine the scope, frequency, direction, and volume of the data exchange, as well as the security and performance considerations².

* A. Disable Trigger Handler records and C. Use the Data Import Wizard are not valid steps for the initial integration planning. Disabling Trigger Handler records is a step that may be required when installing the Education Data Architecture (EDA) package in an existing Salesforce org, as it can prevent conflicts with existing triggers and workflows³. However, this is not related to the integration with the SIS. Using the Data Import Wizard is a tool that can be used to import data from external sources into Salesforce, such as accounts, contacts, leads, etc⁴. However, this is not a step for the initial integration planning, but rather a possible option for the data migration or loading.

NEW QUESTION 96

A high school recently implemented the K-12 Architecture Kit and wants to track student absences from class and midyear grades. Which two objects should the consultant use to address these requirements? Choose 2 answers.

- A. Behavior Involvement
- B. Program Enrollment
- C. Term Grade
- D. Attendance Event

Answer: CD

Explanation:

Term Grade and Attendance Event are two objects that the consultant should use to address the requirements of tracking student absences from class and midyear grades. Term Grade is an object that stores the grades that a student receives for a course offering in a specific term. Attendance Event is an object that stores information about a student's attendance or absence for a course offering or a course connection. Behavior Involvement and Program Enrollment are not objects that can track student absences from class and midyear grades. References:

? <https://powerofus.force.com/s/article/K12-Architecture-Kit-Data-Dictionary>

? <https://powerofus.force.com/s/article/K12-Architecture-Kit-Term-Grades>

? <https://powerofus.force.com/s/article/K12-Architecture-Kit-Attendance>

NEW QUESTION 99

A university to use Salesforce for its recruitment and admissions process and needs to integrate it with the Student Information System (SIS). Which step should the consultant take initially?

- A. Identify Integration layers.
- B. Disable Trigger Handler records.
- C. Use the Data Import Wizard.

Answer: A

Explanation:

The first step that the consultant should take when integrating Salesforce with the Student Information System (SIS) is to identify the integration layers, which are the components that define how data is exchanged between the systems, such as the data model, the data format, the data transport, and the data security. This will help the consultant understand the scope and complexity of the integration project and choose the appropriate tools and methods. Disabling Trigger Handler records and using the Data Import Wizard are steps that can be taken later in the project execution or testing phase, not initially. References:

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-integrations>

? https://help.salesforce.com/s/articleView?id=sf.data_loader_disable_triggers_workf_low.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.data_importer.htm&type=5

NEW QUESTION 100

An institution's Admissions office needs a solution to help recruiters manage their travel, including route planning. The office also wants the ability to identify students' locations so they can be invited to a recruitment event.

Which solution should the consultant recommend to meet these requirements?

- A. Field Service
- B. Salesforce Maps
- C. Territory Management

Answer: B

Explanation:

The consultant should recommend Salesforce Maps as a solution to help recruiters manage their travel, including route planning, and identify students' locations so they can be invited to a recruitment event for the institution's Admissions office. Salesforce Maps is a product that allows users to optimize their territories, routes, and schedules based on geographic data and insights. Salesforce Maps can help recruiters manage their travel, including route planning, and identify students' locations so they can be invited to a recruitment event by using features such as Live Tracking, Route Optimization, Geocoding, or Map Layers. Field Service, Territory Management, or Marketing Cloud are not solutions that can help recruiters manage their travel, including route planning, and identify students' locations so they can be invited to a recruitment event for the institution's Admissions office. References:

? <https://www.salesforce.com/products/maps/overview/>

? <https://trailhead.salesforce.com/en/content/learn/modules/salesforce-maps-basics>

NEW QUESTION 103

An institution is experiencing record locking and sharing performance issues in a Salesforce org with the Education Data Architecture (EDA). A consultant notices

there are more than 10,000 child records associated to a single parent record.
Which object should the consultant review first?

- A. Accounts
- B. Relationships
- C. Affiliations

Answer: B

Explanation:

The consultant should review the Relationships object first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA. The Relationships object is an object in EDA that allows users to store information about how two Contacts are related to each other, such as parent-child, sibling, or spouse. The Relationships object can cause record locking and sharing performance issues in a Salesforce org with EDA if there are too many child records associated to a single parent record, such as a Contact with many Relationships or Affiliations. The consultant should review the Relationships object first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA by checking if there are any data skew or ownership skew issues and applying best practices to resolve them. Accounts or Affiliations are not objects that the consultant should review first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA. References:

? <https://powerofus.force.com/s/article/EDA-Relationships>

? https://developer.salesforce.com/docs/atlas.en-us.salesforce_large_data_volumes_bp.meta/salesforce_large_data_volumes_bp/dv_deployments_introduction.htm

NEW QUESTION 108

Which object should be configured for all student and support staff interactions, activities, and assigned support staff?

- A. Relationships
- B. Account
- C. Case
- D. Advising Pools

Answer: C

Explanation:

Case is an object that should be configured for all student and support staff interactions, activities, and assigned support staff. Case is an object that represents a request or an issue that requires resolution or assistance from an organization. Case can be used to track various information about a student's request or issue, such as status, priority, category, or resolution. The consultant can configure Case for all student and support staff interactions, activities, and assigned support staff using features such as Case Assignment Rules, Case Escalation Rules, or Case Teams. Relationships, Account, and Advising Pools are not objects that should be configured for all student and support staff interactions, activities, and assigned support staff. References:

? https://help.salesforce.com/s/articleView?id=sf.cases_overview.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/service_basics/service_basics_cases

NEW QUESTION 110

The VP of Development is preparing to visit the university's top supporters. The VP wants to maximize travel time by prioritizing pledges. that are most likely to close.

Which reporting solution should the consultant recommend?

- A. Salesforce Maps
- B. Opportunity Funnel Report
- C. Einstein Forecasting
- D. Einstein Opportunity Scoring

Answer: D

Explanation:

Einstein Opportunity Scoring is a reporting solution that the consultant can recommend to help the VP of Development prioritize pledges that are most likely to close. Einstein Opportunity Scoring is a feature that uses artificial intelligence to analyze historical data and assign a score to each Opportunity, indicating how likely it is to be won. Einstein Opportunity Scoring also provides insights and explanations for the score, such as key factors and trends. The VP of Development can use Einstein Opportunity Scoring to sort and filter Opportunities by their score and focus on the ones with the highest probability of closing. Salesforce Maps, Opportunity Funnel Report, and Einstein Forecasting are not reporting solutions that can help the VP of Development prioritize pledges that are most likely to close. References:

? https://help.salesforce.com/s/articleView?id=sf.einstein_sales_oppty_scoring.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/einstein_sales/einstein_sales_opportunity_scoring

NEW QUESTION 115

The director of retention wants to use Advisor Link to track early alerts, help students schedule appointments with their advisers, and create program plans.

Which two options are required to use Advisor Link? Choose 2 answers.

- A. Person Accounts
- B. Customer Community Plus
- C. Lightning Scheduler
- D. Education Data Architecture

Answer: BD

Explanation:

Customer Community Plus and Education Data Architecture (EDA) are two options that are required to use Advisor Link. Customer Community Plus is a license type that enables users to access Advisor Link features such as early alerts, appointments, and program plans from a portal. EDA is a data model that provides the foundation for Advisor Link and other education solutions. Person Accounts and Lightning Scheduler are not required to use Advisor Link. References:

? https://help.salesforce.com/s/articleView?id=sf.eda_advisor_link_requirements.htm&type=5

? <https://www.salesforce.org/advisor-link/>

NEW QUESTION 117

A consultant is setting up Student Success Hub for a university. A Contact record has already been created for a student. Which two steps should a consultant take to set up a student in Student Success Hub? Choose 2 answers

- A. Create a Student Case record.
- B. Create a User record.
- C. Create a Household Account record.
- D. Create an Administrative Account record.

Answer: AD

Explanation:

The consultant should create a Student Case record and an Administrative Account record to set up a student in Student Success Hub. Student Case is an object that represents a student's request for assistance or support from an advisor or a counselor. Student Case can be used to track various information about a student's issue, such as status, priority, category, or resolution. The consultant should create a Student Case record for each student who needs assistance or support from Student Success Hub. Administrative Account is an account model that allows users to store information about individuals who are related to an educational institution, such as students, faculty, staff, or alumni. Administrative Account can be used to track various information about an individual, such as name, email, phone, or address. The consultant should create an Administrative Account record for each student who is enrolled in the educational institution. Creating a User record or a Household Account record are not steps to set up a student in Student Success Hub. References:

? <https://www.salesforce.org/products/student-success-hub/overview/>

? <https://powerofus.force.com/s/article/SSHUB-Student-Cases>

? <https://powerofus.force.com/s/article/EDA-Accounts>

NEW QUESTION 118

The Executive Education department plans to use the Education Data Architecture (EDA) for prospective and current students. The system admin wants to map prospects and students' employers to the standard Account field in Salesforce. Which action should the consultant recommend instead?

- A. Populate the employer Affiliation record in the Primary Business Organization field.
- B. Select Administrative as the Default Account Model in EDA Settings.
- C. Select Organization as the Default Account Model in EDA Settings.

Answer: A

Explanation:

The action that the consultant should recommend instead of mapping prospects and students' employers to the standard Account field in Salesforce is A. Populate the employer Affiliation record in the Primary Business Organization field¹. This is because EDA uses a different account model than the standard Salesforce account model, which allows for more flexibility and scalability in capturing the complex relationships and affiliations that exist in the education sector². In EDA, an Account can represent different types of entities, such as an individual person, a household, an educational institution, an organization, or a course offering. Each Account can have a record type that defines its attributes and behavior. EDA also provides two custom objects, Relationship and Affiliation, that allow for creating connections between Accounts and Contacts. A Relationship is a connection between two Contacts, such as a parent-child or a mentor-mentee relationship. An Affiliation is a connection between a Contact and an Account, such as a student's enrollment in a course offering, or an employee's association with an organization².

By using the Affiliation object, the system admin can link prospects and students to their employers, which are represented by Accounts with the Organization record type. The system admin can also specify which Affiliation is the primary one for each Contact, by populating the Primary Business Organization field on the Contact record. This field is a lookup to the Affiliation object, and it allows for displaying the employer's name and other information on the Contact page layout. By using this approach, the system admin can avoid creating duplicate or unnecessary Accounts, and can leverage the EDA data model to capture the full network of prospects and students¹.

* B. Select Administrative as the Default Account Model in EDA Settings and C. Select Organization as the Default Account Model in EDA Settings are not valid actions for this scenario. The Default Account Model in EDA Settings is a setting that determines how EDA creates Accounts for new Contacts that are created in Salesforce. The Administrative Account Model creates one Account per Contact, and assigns the same name to both records. The Household Account Model creates one Account per household, and assigns a household name to the Account. The Organization Account Model creates one Account per organization, and assigns an organization name to the Account. However, these settings do not affect how EDA maps prospects and students' employers to the standard Account field in Salesforce, as they only apply to new Contacts and Accounts that are created in EDA³.

NEW QUESTION 122

A university plans to implement Salesforce. The project lead is drafting a communication plan and has asked the consultant to provide examples of communications to send after implementation. Which communication example should a consultant recommend?

- A. User contest
- B. Teaser email
- C. Project sponsor profile

Answer: A

Explanation:

User contest and post go-live recap are two communication examples that the consultant can recommend to send after implementation. User contest is a type of communication that encourages users to participate in a competition or a challenge related to using Salesforce, such as completing a certain number of tasks, earning badges on Trailhead, or submitting feedback or ideas. User contest can help increase user engagement, adoption, and satisfaction with Salesforce. Post go-live recap is a type of communication that summarizes the results and outcomes of the implementation project, such as key achievements, lessons learned, success stories, or next steps. Post go-live recap can help celebrate the project completion, acknowledge the project team and stakeholders, and provide guidance for future improvements. Teaser email and project sponsor profile are two communication examples that the consultant can recommend to send before implementation. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

? https://trailhead.salesforce.com/en/content/learn/modules/change_management/change_management_communicate

NEW QUESTION 127

A university system purchased Salesforce and wants to move to an enterprise model for all of the schools in the system. The university needs to track students both as individuals and as part of a household. The Recruitment and Admissions office also wants to track events, the event locations, and the event vendors. Which account model should the consultant recommend?

- A. Education Data Architecture (EDA) Account Model
- B. Person Account Model
- C. Standard Account Model

Answer: A

Explanation:

The consultant should recommend the Education Data Architecture (EDA) Account Model as the account model for the university system that purchased Salesforce and wants to move to an enterprise model for all of the schools in the system. The EDA Account Model is an account model that allows users to store information about individuals or organizations that are related to an educational institution, such as students, parents, faculty, staff, alumni, or donors. The EDA Account Model can help the university system track students both as individuals and as part of a household using features such as Contacts, Accounts, Relationships, or Affiliations. The EDA Account Model can also help the Recruitment and Admissions office track events, the event locations, and the event vendors using features such as Campaigns or Campaign Members. The Person Account Model and the Standard Account Model are not account models that can meet the requirements of the university system that purchased Salesforce and wants to move to an enterprise model for all of the schools in the system.

References:

? <https://powerofus.force.com/s/article/EDA-Accounts>

? <https://powerofus.force.com/s/article/EDA-Campaigns>

NEW QUESTION 131

Where can a customer find more information on Salesforce open-source and community sprint information?

- A. Trust.salesforce.com
- B. Trailblazer Community
- C. Partner Community

Answer: B

Explanation:

The customer can find more information on Salesforce open-source and community sprint information on Trailblazer Community. Trailblazer Community is a platform that connects Salesforce customers, partners, employees, and enthusiasts to learn, share, and collaborate on Salesforce topics and projects. Trailblazer Community provides information on Salesforce open-source and community sprint events, such as dates, locations, agendas, or registration links. The customer can also join groups, forums, or blogs related to Salesforce open-source and community sprint topics on Trailblazer Community. Trust.salesforce.com, Partner Community, or AppExchange are not platforms where the customer can find more information on Salesforce open-source and community sprint information.

References:

? <https://trailhead.salesforce.com/en/content/learn/modules/trailblazer-community-basics>

? <https://trailblazercommunitygroups.com/sprints/>

NEW QUESTION 134

An elementary school plans to implement the K-12 Architecture Kit in a new org. The school want to be able to send SMS messengers to parents. Which solution should the consultant recommend to meet the requirement?

- A. Parbot
- B. Social Studio
- C. Education Data Architecture
- D. App on the AppExchange

Answer: D

Explanation:

An app on the AppExchange is a solution that the consultant can recommend to meet the requirement of sending SMS messages to parents. An app on the AppExchange is an application that provides additional features and solutions for Salesforce. There are many apps on the AppExchange that offer SMS messaging capabilities, such as sending and receiving text messages, automating SMS campaigns, and tracking SMS analytics. The consultant can help the elementary school choose an app that meets their needs and budget. Pardot, Social Studio, and Education Data Architecture are not solutions that can send SMS messages to parents. References:

? <https://appexchange.salesforce.com/appxStore?type=App&keyword=sms>

? https://trailhead.salesforce.com/en/content/learn/modules/appexchange_basics

NEW QUESTION 136

The IT department at a university has asked its consultant to build a Salesforce integration strategy. Which integration consideration should the consultant outline?

- A. Data element
- B. Salesforce license type
- C. Sandbox environment

Answer: A

Explanation:

The consultant should outline data element as an integration consideration when building a Salesforce integration strategy for the IT department at a university. Data element is an integration consideration that refers to the type, format, quality, or volume of data that will be exchanged between systems. The consultant should outline data element as an integration consideration when building a Salesforce integration strategy for the IT department at a university by identifying what data needs to be integrated, how it will be transformed or mapped, how it will be validated or cleansed, or how it will be stored or archived. Salesforce license type, sandbox environment, or security model are not integration considerations that the consultant should outline when building a Salesforce integration strategy for the IT department at a university. References:

? https://trailhead.salesforce.com/en/content/learn/modules/api_basics/api_basics_data

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

NEW QUESTION 140

A system admin plans to load data into Salesforce in the following order. Team, Course, Course offering, and Account. What should the consultant discuss with the system admin?

- A. Account is a required field for Team.
- B. There is a risk of account data skew.
- C. There is a risk of lookup data skew.

Answer: C

Explanation:

There is a risk of lookup data skew when loading data into Salesforce in the order of Team, Course, Course Offering, and Account, because the Team object has a lookup relationship to the Account object, and many Team records may reference the same Account record. This can cause performance issues when querying or updating the data. Account is not a required field for Team, and there is no risk of account data skew, which occurs when a single user owns a large number of Account records. References:

? https://help.salesforce.com/s/articleView?id=sf.data_loader_lookup_skew.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.data_loader_account_skew.htm&type=5

? <https://powerofus.force.com/s/article/EDA-Team>

NEW QUESTION 145

A primary school has implemented the K-12 Architecture Kit. The school needs to report out basic student demographic information. What should the consultant do to meet this requirement?

- A. Create a new student demographic dashboard.
- B. Refer to the existing sample student demographic dashboard.
- C. Use the Student Success Hub Tableau Accelerator.

Answer: B

Explanation:

The consultant should refer to the existing sample student demographic dashboard to report out basic student demographic information for the primary school that has implemented K-12 Architecture Kit. The sample student demographic dashboard is a dashboard that comes with K-12 Architecture Kit and shows information about students' demographics, such as gender, ethnicity, grade level, or school. The sample student demographic dashboard can help the primary school report out basic student demographic information by using features such as charts, tables, or filters. The consultant can also customize or modify the sample student demographic dashboard to meet the primary school's specific needs or preferences. Creating a new student demographic dashboard, using the Student Success Hub Tableau Accelerator, or creating a custom Report Type are not things that the consultant should do to report out basic student demographic information for the primary school that has implemented K-12 Architecture Kit. References:

? <https://www.salesforce.org/products/k-12-architecture-kit/overview/>

? <https://powerofus.force.com/s/article/K12-Dashboards>

NEW QUESTION 147

A CRM committee for a university has asked a consultant about the major release cadence of Salesforce.org and Salesforce.com platform enhancements. When are Salesforce.org releases?

- A. Approximately two weeks after Salesforce.com releases
- B. Approximately one month before Salesforce.com releases
- C. Approximately two weeks before Salesforce.com releases
- D. Approximately one month after Salesforce.com releases

Answer: A

Explanation:

Salesforce.org releases are approximately two weeks after Salesforce.com releases. This means that Salesforce.org customers can benefit from both platform enhancements and industry-specific solutions in a timely manner. The other options are incorrect because they do not reflect the actual release cadence of Salesforce.org. References:

? <https://powerofus.force.com/s/article/SFDO-Release-Schedule>

? <https://www.salesforce.org/blog/salesforce-org-release-schedule/>

NEW QUESTION 148

A university plans to use a sandbox for staff training. Since sandbox environments contain personal information, the university needs a solution that will keep sensitive information anonymous.

What should the consultant recommend to ensure that student information remains private?

- A. Salesforce Data Mask
- B. Formula Fields
- C. Event Monitoring
- D. Salesforce Shield

Answer: A

Explanation:

Salesforce Data Mask is a solution that the consultant can recommend to ensure that student information remains private in a sandbox environment. Salesforce Data Mask allows the consultant to anonymize or delete sensitive data in a sandbox, such as names, emails, phone numbers, and addresses. Salesforce Data Mask also preserves the data relationships and functionality, so the sandbox can still be used for staff training. Formula Fields, Event Monitoring, and Salesforce Shield are not solutions that can keep sensitive information anonymous in a sandbox. References:

? https://help.salesforce.com/s/articleView?id=sf.data_mask.htm&type=5

? <https://www.salesforce.com/products/platform/features/data-mask/>

NEW QUESTION 151

The director of advising wants to better understand why students are meeting with their advisors. Which Advisor Link Feature should the consultant include in a report?

- A. Success Plan Type
- B. Alert Reason
- C. Appointment Topic
- D. Case Status

Answer: C

Explanation:

Appointment Topic is an Advisor Link feature that the consultant should include in a report to better understand why students are meeting with their advisors. Appointment Topic is a field on the Appointment object that indicates the reason or subject of the meeting. Success Plan Type, Alert Reason, and Case Status are not Advisor Link features that show why students are meeting with their advisors. References:
? https://help.salesforce.com/s/articleView?id=sf.eda_appointment_topic.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.eda_advisor_link_reports.htm&type=5

NEW QUESTION 155

A university's IT department uses a version control-based process for its system development and enhancement. The department wants to test the new features the consultant has configured in a dedicated, short term Salesforce environment. What should the consultant use to meet the requirement?

- A. Scratch org
- B. Developer Edition org
- C. Full sandbox
- D. Partial Copy sandbox

Answer: A

Explanation:

A scratch org is a dedicated, short term Salesforce environment that the consultant can use to test the new features they have configured in a version control-based process. A scratch org is a source-driven and disposable deployment of Salesforce code and metadata. A scratch org is fully configurable, allowing the consultant to emulate different Salesforce editions and features. A Developer Edition org, a full sandbox, and a partial copy sandbox are not dedicated, short term Salesforce environments that can be used in a version control-based process. References:
? https://developer.salesforce.com/docs/atlas.en-us.sfdx_dev.meta/sfdx_dev/sfdx_dev_scratch_orgs.htm
? <https://trailhead.salesforce.com/en/content/learn/modules/scratch-orgs>

NEW QUESTION 156

Advisors at a university send follow-up emails to each of then assigned students. The advisors want to use Student Success Hub to enable this process. Which solution should a consultant implement?

- A. Queue Management
- B. Mass Actions
- C. Alerts

Answer: B

Explanation:

Mass Actions allow advisors to send follow-up emails to multiple students at once from the Student Success Hub. Queue Management is a feature that helps advisors prioritize their tasks and appointments, not send emails. Alerts are notifications that appear on the Student Success Hub to inform advisors of important events or actions, not send emails. References:
? https://help.salesforce.com/s/articleView?id=sf.advisor_link_mass_actions.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.advisor_link_queue_management.htm&type=5
? https://help.salesforce.com/s/articleView?id=sf.advisor_link_alerts.htm&type=5

NEW QUESTION 158

A consultant is working with a customer who already uses Salesforce and wants to enable Education Cloud. The consultant has confirmed that Education Cloud can work in the customer's existing environment. Starting in a sandbox, which location should the consultant visit to enable Education Cloud in the existing environment?

- A. App Launcher
- B. Setting
- C. My Account

Answer: B

Explanation:

? Enabling Education Cloud in Existing Environment:
? Steps to Enable Education Cloud:
? Verification: References:
? Salesforce Help: Enable Education Cloud

NEW QUESTION 163

The Executive Education department uses Salesforce to track sales of custom education programs to corporations and organizations. The department director needs to know the pipeline of custom programs. How should the consultant meet this business requirement?

- A. Create custom report type.
- B. Use an Opportunity report.
- C. Set up an Affiliations report.
- D. Configure a list view.

Answer: B

Explanation:

The consultant should use an Opportunity report to meet the business requirement of showing the pipeline of custom programs for the Executive Education department. An Opportunity report is a type of report that shows information about Opportunities, such as amount, stage, probability, or close date. An Opportunity report can help the department director know the pipeline of custom programs by showing the distribution and performance of Opportunities by various criteria, such as program type, account, or owner. Creating a custom report type, setting up an Affiliations report, or configuring a list view are not ways to meet the business requirement of showing the pipeline of custom programs for the Executive Education department. References:

? https://help.salesforce.com/s/articleView?id=sf.reports_standard_opp.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/reports_dashboards/reports_dashboards_funnel

NEW QUESTION 168

A customer wants to learn more about Salesforce.org solutions built by the community. What are two resources a consultant can recommend?
Choose 2 answers.

- A. Product Documentation: Is a Pro Bono Project the Right Fit
- B. Power of Us Hub Group: CumulusCI (CCI)
- C. Product Documentation: Get Started with Open Source Commons
- D. Power of Us Hub Group: Open Source Commons & Community Sprints

Answer: BD

Explanation:

The Power of Us Hub Group: CumulusCI (CCI) and the Power of Us Hub Group: Open Source Commons & Community Sprints are two resources that the consultant can recommend to learn more about Salesforce.org solutions built by the community. CumulusCI is a tool that helps developers build, test, and deploy Salesforce.org solutions using a standardized process. Open Source Commons & Community Sprints are events where community members collaborate on building and improving Salesforce.org solutions. Product Documentation: Is a Pro Bono Project the Right Fit and Product Documentation: Get Started with Open Source Commons are not resources that teach about Salesforce.org solutions built by the community, but rather resources that help customers decide whether to apply for a pro bono project or join the Open Source Commons program. References:

? <https://powerofus.force.com/s/group/0F9800000000CjQOCA0/cumulusci-cci>

? <https://powerofus.force.com/s/group/0F9800000000CjQSCA0/open-source-commons-community-sprints>

NEW QUESTION 172

The Advancements Office wants Salesforce to automatically create a supporters' score based on their donation amount, giving capacity, giving history, and relationship type to the university.
Which Salesforce solution should the consultant recommend?

- A. Tableau CRM
- B. Nonprofit Success Pack
- C. Einstein Prediction Builder
- D. Insights Platform Data Integrity

Answer: C

Explanation:

Einstein Prediction Builder is a Salesforce solution that the consultant can recommend to automatically create a supporters' score based on their donation amount, giving capacity, giving history, and relationship type to the university. Einstein Prediction Builder allows the consultant to create custom predictive models without code, using fields from any object as inputs and outputs. Tableau CRM, Nonprofit Success Pack, and Insights Platform Data Integrity are not Salesforce solutions that can create a supporters' score based on the given criteria. References:

? https://help.salesforce.com/s/articleView?id=sf.bi_prediction_builder_overview.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/prediction_builder_basics

NEW QUESTION 175

A consultant is considering disabling certain configurations to optimize the data import of a large volume of student records into a university's Salesforce environment with the Education Data.

Which configuration should the consultant retain during the data import?

- A. Workflow rules
- B. Sharing rules
- C. Role hierarchy

Answer: B

Explanation:

The consultant should retain sharing rules during the data import because they control the access and visibility of records based on criteria such as record ownership, role hierarchy, or field values. Disabling sharing rules may cause data security or privacy issues. Workflow rules and role hierarchy are configurations that can be disabled during the data import to improve performance and avoid errors or conflicts. References:

? https://help.salesforce.com/s/articleView?id=sf.data_loader_disable_triggers_workflow.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.data_loader_sharing_rules.htm&type=5

NEW QUESTION 176

The Recruitment and Admissions office wants to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices. Prospective students communicate via SMS on their mobile devices, social media, and email.

Which solution should the consultant recommend?

- A. Third-party app
- B. Salesforce Maps
- C. Einstein Bots

Answer: C

Explanation:

The best solution for the Recruitment and Admissions office to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices is C. Einstein Bots¹². Einstein Bots are chatbots that use artificial intelligence (AI) to automate conversations with prospective students on various channels, such as SMS, social media, and email. They can provide information, answer questions, collect data, and hand off the conversation to a human agent if needed. Einstein Bots can help the Recruitment and Admissions office to track digital engagement and interactions with prospects on their mobile devices, and improve the student experience¹².

A third-party app is not a Salesforce solution and may not be compatible with the Salesforce platform or the Education Data Architecture (EDA) that the Recruitment and Admissions office uses. Salesforce Maps is a location intelligence solution that helps sales and service teams optimize their territories, routes, and schedules³. It is not directly relevant to the scenario described in the question.

NEW QUESTION 177

A system admin has an idea for a custom solution for their org and thinks it might be useful to others as well. The system admin discusses it with colleagues from two other schools. They are excited about the system admin's idea and offer to help.

What should the system admin consider doing as a next step?

- A. Post the idea in the Trailblazer Idea Exchange.
- B. Download and install the project from GitHub.
- C. Ask colleagues to sign a nondisclosure agreement.
- D. Join the Open Source Commons & Community Sprints group

Answer: D

Explanation:

The system admin should consider joining the Open Source Commons & Community Sprints group in the Power of Us Hub as a next step for their custom solution idea. The Open Source Commons & Community Sprints group is a group that connects users who are interested in contributing to or learning from open source projects that are supported by Salesforce.org. The Open Source Commons & Community Sprints group provides access to resources, events, discussions, and opportunities related to various open source projects, such as EDA, NPSP, CumulusCI, or Metecho. The system admin can join the group and share their idea with other users who may want to collaborate on it or provide feedback. Posting the idea in the Trailblazer Idea Exchange, downloading and installing the project from GitHub, or asking colleagues to sign a nondisclosure agreement are not next steps that the system admin should consider for their custom solution idea.

References:

? <https://powerofus.force.com/s/group/0F9800000000CjQOCA0/sfdo-open-source-contributors>

? <https://www.salesforce.org/open-source-commons/>

NEW QUESTION 179

The Undergraduate Advising department plans to implement Student Success Hub and Pathways in a new org. The system admin wants to use the recommended setup for external users.

Which security setting should the consultant configure?

- A. Create an Account sharing rule to provide Read access based on record type.
- B. Create a Program Plan sharing rule to provide Read access based on record type.
- C. Change the default Program Plan sharing setting to Private.

Answer: B

Explanation:

The consultant should configure a security setting to create a Program Plan sharing rule to provide Read access based on record type for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. A sharing rule is a security setting that allows users to extend sharing access to users in public groups, roles, or territories. A Program Plan sharing rule can help the system admin provide Read access to external users based on record type by granting access to specific Program Plan records that are relevant or appropriate for external users, such as students or advisors. Creating an Account sharing rule to provide Read access based on record type, changing the default Program Plan sharing setting to Private, or creating a custom Permission Set for external users are not security settings that the consultant should configure for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. References:

? https://help.salesforce.com/s/articleView?id=sf.sharing_overview.htm&type=5

? <https://powerofus.force.com/s/article/SSHUB-Pathways>

NEW QUESTION 180

Recruitment Staff want to use their university login when accessing Salesforce.

Which identity management feature should the consultant use?

- A. Named Credentials
- B. Two-factor Authentication
- C. Social Sign-On
- D. Single Sign-On

Answer: D

Explanation:

Single Sign-On (SSO) is an identity management feature that allows users to log in to Salesforce using their university login credentials. SSO simplifies the login process and reduces the need for multiple passwords. Named Credentials, Two-factor Authentication, and Social Sign-On are not identity management features that allow users to use their university login when accessing Salesforce. References:

? https://help.salesforce.com/s/articleView?id=sf.identity_sso.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/identity_basics/identity_basics_sso

NEW QUESTION 185

University Investment Services (UIS) is an internal department that manages the university endowment through financial investments. It operates independently of the university and only works with investment companies and financial institutions. UIS is interested in a CRM that will track investment companies, its company Contacts, Leads, Opportunities, and Activities.
Which solution should the consultant recommend?

- A. Sales Cloud
- B. Education Data Architecture
- C. Financial Services Cloud

Answer: C

Explanation:

Financial Services Cloud is a Salesforce solution that is designed for the financial services industry, including wealth and asset management, banking, and insurance¹. Financial Services Cloud provides features and functionality that are tailored to the needs of UIS, such as:

- ? Tracking investment companies and their contacts as financial accounts and account members².
- ? Managing leads, opportunities, and activities with standard Salesforce objects and tools³.
- ? Leveraging Einstein AI to surface insights and recommendations for investment opportunities⁴.
- ? Integrating with core financial systems and data sources using prebuilt connectors and accelerators⁵.

Sales Cloud is a general-purpose CRM solution that does not have the specific features and functionality for the financial services industry⁶. Education Data Architecture (EDA) is a Salesforce solution that is designed for the education sector, including K-12 and higher education institutions⁷. EDA does not have the specific features and functionality for the financial services industry either.

References:

- ? 1: Financial Services Cloud Overview - Salesforce⁸
- ? 2: Financial Services Cloud Data Model - Salesforce
- ? 3: Financial Services Cloud User Guide - Salesforce
- ? 4: Einstein for Financial Services Cloud - Salesforce
- ? 5: Financial Services Cloud Integration Guide - Salesforce
- ? 6: Sales Cloud Overview - Salesforce
- ? 7: Education Data Architecture Overview - Salesforce

NEW QUESTION 188

A primary school will implement Student Success Hub to support student needs from K-12. The school primarily needs to track students' families and communicate with the parents on issues.
Which default account model should the consultant recommend?

- A. Standard Account Model
- B. Household Account Model
- C. Administrative Account Model

Answer: B

Explanation:

The Household Account Model in EDA creates one account for each household and associates multiple contacts with that account. This model is suitable for tracking students' families and communicating with the parents on issues. The Household Account Model also provides features such as automatic household naming, address management, and rollup fields. The consultant should recommend this model for the primary school that will implement Student Success Hub.

References: [Salesforce Education Cloud Academy: Consultant Fundamentals], [EDA Account Models]

NEW QUESTION 192

A consultant is making changes to compact layouts in the Education Data Architecture (EDA) and wants those changes to persist when a new release is pushed to the Salesforce environment.
Which step should the consultant take to accomplish this?

- A. Clone the EDA Compact Layout.
- B. Edit the Mini Page Layout.
- C. Assign the Mini Page Layout to all users.

Answer: A

Explanation:

The consultant should clone the EDA Compact Layout as a step to accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment. A compact layout is a layout that shows key fields of a record in a summary view, such as in a list view or a record highlight panel. Cloning the EDA Compact Layout means creating a copy of the default compact layout provided by EDA and making changes to it, such as adding or removing fields. Cloning the EDA Compact Layout can help the consultant accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment by ensuring that the custom compact layout will not be overwritten by EDA updates. Editing the Mini Page Layout, assigning the Mini Page Layout to all users, or creating a custom Record Type are not steps that the consultant should take to accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment.

References:

- ? https://help.salesforce.com/s/articleView?id=sf.compact_layouts_overview.htm&type=5
- ? <https://powerofus.force.com/s/article/EDA-Compact-Layouts>

NEW QUESTION 195

A university is interested in the Student Success Hub Tableau Accelerator. Which object should the consultant recommend to ensure there is data?

- A. Behavior Incident
- B. Appointment Attendee
- C. Availability Topic

Answer: B

Explanation:

The Appointment Attendee object in Student Success Hub is used to track the students and support staff who attend an appointment¹. The Student Success Hub Tableau Accelerator uses data from this object, along with other objects such as Alert, Appointment, Case, Contact, Course Connection, Course Offering, Program Enrollment, Term, and User, to create visualizations of student and support staff data². The Behavior Incident object is not part of Student Success Hub or the Tableau Accelerator. The Availability Topic object is used to categorize the availability of support staff for appointments¹, but it is not used by the Tableau Accelerator. References:

? 1: EDA Object Reference - Salesforce³

? 2: Analyze Student Success Data with the Tableau Accelerator - Salesforce⁴

NEW QUESTION 198

A university wants to improve student retention by developing a tool for students to engage at scale, find answers to common questions and resources, and allow students to interact with student organizations. What should a consultant recommend to meet this requirement?

- A. Experience Cloud
- B. Pardot Engagement Studio
- C. Interaction Studio
- D. Einstein Bots

Answer: A

Explanation:

Experience Cloud is a solution that the consultant can recommend to meet the requirement of developing a tool for students to engage at scale, find answers to common questions and resources, and allow students to interact with student organizations. Experience Cloud is a product that allows users to create and manage digital experiences for customers, partners, or employees on any device or channel. Experience Cloud can help the university improve student retention by creating a student community that provides features such as forums, articles, chat, groups, events, or surveys. Pardot Engagement Studio, Interaction Studio, and Einstein Bots are not solutions that can meet the requirement of developing a tool for students to engage at scale, find answers to common questions and resources, and allow students to interact with student organizations. References:

? <https://www.salesforce.com/products/experience-cloud/overview/>

? https://trailhead.salesforce.com/en/content/learn/modules/community_rollout_impl/community_rollout_impl_introduction

NEW QUESTION 199

A college plans to implement Student Success Hub and wants to configure Pathways to support students in their academic journey. What should be considered when implementing Pathways?

- A. There is a limit to the number of Plan Requirement records.
- B. Pathways uses Program Plan and Plan Requirement records.
- C. There are only two levels of Program Plan requirements in Pathways.

Answer: B

Explanation:

The college should consider that Pathways uses Program Plan and Plan Requirement records when implementing Pathways to support students in their academic journey. Pathways is a feature in Student Success Hub that allows users to create and manage personalized learning plans for students based on their goals and interests. Pathways uses Program Plan and Plan Requirement records to define the structure and requirements of a learning plan, such as courses, credits, or milestones. The college should consider that Pathways uses Program Plan and Plan Requirement records when implementing Pathways to support students in their academic journey by configuring and customizing these records to match their academic programs and policies. There is a limit to the number of Plan Requirement records or there are only two levels of Program Plan requirements in Pathways are not things that the college should consider when implementing Pathways to support students in their academic journey. References:

? <https://www.salesforce.org/products/student-success-hub/overview/>

? <https://powerofus.force.com/s/article/SSHUB-Pathways>

NEW QUESTION 202

The Advancement office is replacing its old CRM system with Salesforce.

After creating its technology roadmap and fundraising timeline, the new Salesforce environment may go live during a major capital fundraising campaign.

Which critical factor should the consultant identify?

- A. Resource availability
- B. Technical complexity
- C. Staff cross-training
- D. Cost of the implementation

Answer: A

Explanation:

The consultant should identify resource availability as a critical factor for the Advancement office's new Salesforce environment going live during a major capital fundraising campaign. Resource availability refers to the amount and type of resources that are needed and available for a project, such as staff, time, budget, or equipment. Resource availability is a critical factor for the Advancement office's new Salesforce environment going live during a major capital fundraising campaign, because it can affect the project scope, timeline, quality, and success. The consultant should assess and plan for resource availability to ensure that the project can be completed and delivered without compromising the fundraising campaign. Technical complexity, staff cross-training, and cost of the implementation are not critical factors for the Advancement office's new Salesforce environment going live during a major capital fundraising campaign. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

? <https://trailhead.salesforce.com/en/content/learn/modules/project-management-basics/project-management-basics-plan>

NEW QUESTION 206

A community college would like to use Admissions Connect and automatically admit applicants if they meet certain criteria.

What should the consultant do?

- A. Create a new flow.
- B. Activate the ApplicantCommunityHomePageController Apex class.

C. Leverage the existing flow Sample: Application Auto Admit.

Answer: C

Explanation:

The consultant should leverage the existing flow Sample: Application Auto Admit to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect. A flow is a tool that allows users to automate business processes by guiding users through screens, collecting data, or executing actions. Sample: Application Auto Admit is an existing flow in Admissions Connect that allows users to automatically admit applicants if they meet certain criteria, such as GPA or test scores. The consultant can leverage the existing flow Sample: Application Auto Admit to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect by configuring and customizing the flow to match their admission requirements and policies. Creating a new flow, activating the ApplicantCommunityHomePageController Apex class, or developing a custom trigger that checks the submission deadline against the current date are not things that the consultant should do to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect. References:

? <https://help.salesforce.com/s/articleView?id=sf.flow.htm&type=5>

? <https://www.salesforce.org/products/admissions-connect/overview/>

NEW QUESTION 209

The Advancement team at a large university needs a solution for digitization volunteer events. Currently, the team manages volunteer opportunities and shift sign-ups using multiple spreadsheets.

Which solution should a consultant recommend?

- A. Event Monitoring
- B. A third-party app
- C. Process Builder

Answer: B

Explanation:

A third-party app can provide a solution for managing volunteer events, such as Volunteerforce or HandsOn Connect, which are available on the AppExchange. Event Monitoring is a feature that tracks user activity and performance, not volunteer events. Process Builder is a tool that automates business processes, not event management. References:

? <https://trailhead.salesforce.com/en/content/learn/modules/volunteer-management-basics>

? https://help.salesforce.com/s/articleView?id=sf.event_monitoring.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.process_overview.htm&type=5

NEW QUESTION 214

A university works with business professionals through a continuing education program. Corporate recruiters work with employers to sponsor these programs. Which object should recruiters use to track the progress of sponsorship requests?

- A. Campaign
- B. Opportunity
- C. Program Plan
- D. Affiliation

Answer: B

Explanation:

Opportunity is an object that recruiters should use to track the progress of sponsorship requests. Opportunity is an object that represents a potential sale or revenue source for an organization, such as a donation, grant, or sponsorship. Opportunity can be used to track various information about a sponsorship request, such as amount, stage, probability, or close date. Campaign, Program Plan, and Affiliation are not objects that recruiters should use to track the progress of sponsorship requests. References:

? https://help.salesforce.com/s/articleView?id=sf.opportunity_overview.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/nonprofit_fundraising/nonprofit_fundraising_opportunities

NEW QUESTION 216

A university plans to use Salesforce to manage its recruitment and admissions process. A prospective student goes through four maturation stages: Suspects, Prospects, Applicants, and Matriculated. IDs are assigned by the Student Information System (SIS) at the Applicant stage.

Salesforce is the system of record in which two stages? Choose 2 answers

- A. Matriculated
- B. Suspect
- C. Prospect
- D. Applicant

Answer: BC

Explanation:

Salesforce is the system of record in the Suspect and Prospect stages of the recruitment and admissions process for the university. A system of record is a system that serves as the authoritative source of data for a given entity or process. Salesforce is the system of record in the Suspect and Prospect stages, because it stores and manages information about potential students who have expressed interest or have been identified as targets by the university, such as name, email, phone, or program of interest. The Student Information System (SIS) is the system of record in the Applicant and Matriculated stages of the recruitment and admissions process for the university. The SIS is a system that stores and manages information about students who have applied or enrolled at the university, such as ID, transcripts, test scores, or financial aid. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

? https://trailhead.salesforce.com/en/content/learn/modules/highered_admissions

NEW QUESTION 220

The Marketing department at a college emails former students twice a year informing them of upcoming fundraising events. The department is concern about the number of bounced emails it receives.

Which solution should the Marketing team consider that will enable former students to update their email address?

- A. social Studio
- B. experience Cloud
- C. Salesforce Engage
- D. Salesforce Inbox

Answer: B

Explanation:

Experience Cloud is a solution that the Marketing team can consider that will enable former students to update their email address. Experience Cloud allows the college to create a branded online community where former students can log in, view and edit their profile information, and interact with other alumni. Experience Cloud also integrates with Salesforce, so any changes made by the former students in the community will be reflected in their Contact records. Social Studio, Salesforce Engage, and Salesforce Inbox are not solutions that can enable former students to update their email address. References:

? <https://www.salesforce.com/products/experience-cloud/overview/>

? https://trailhead.salesforce.com/en/content/learn/modules/community_rollout_impl/community_rollout_impl_basics

NEW QUESTION 222

How should a consultant prepare for a successful Education Cloud discovery session with an institution?

- A. Create an Education Cloud storyboard.
- B. List the current challenges in education.
- C. Build the institution's technology roadmap.
- D. Review the institution's strategic plan.

Answer: D

Explanation:

The consultant should review the institution's strategic plan to prepare for a successful Education Cloud discovery session. The strategic plan is a document that outlines the institution's vision, mission, goals, and priorities for the future. By reviewing the strategic plan, the consultant can understand the institution's context, challenges, opportunities, and expectations. The consultant can also align the discovery session agenda and questions with the strategic plan. Creating an Education Cloud storyboard, listing the current challenges in education, and building the institution's technology roadmap are not tasks that the consultant should do to prepare for a discovery session. References:

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-basics-discovery>

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_Discovery_Guide.pdf

NEW QUESTION 225

The Admissions office sends 25 email 10 students slarty. The Director of needs to manage cohorts of prospective students and automate personalized emails. Which two solutions should the consultant recommend to meet the requirement? Choose 2 answers

- A. Journey Builder
- B. Salesforce Campaigns
- C. Datarama
- D. Salesforce Inbox

Answer: AB

Explanation:

The consultant should recommend Journey Builder and Salesforce Campaigns to meet the requirement of managing cohorts of prospective students and automating personalized emails. Journey Builder is a tool that allows users to design and automate customer journeys across channels, such as email, mobile, social, and web. Salesforce Campaigns is a feature that helps users track and measure the effectiveness of marketing initiatives, such as email campaigns, events, webinars, etc. By using Journey Builder and Salesforce Campaigns together, the Admissions office can create and execute targeted email campaigns for different segments of prospective students, based on their interests, preferences, behaviors, and interactions. The email campaigns can also be personalized with dynamic content, such as student names, program names, deadlines, etc. Additionally, the Admissions office can monitor and analyze the performance of the email campaigns, such as open rates, click rates, conversions, etc., and optimize them accordingly. References: Journey Builder Basics, Salesforce Campaigns, Create and Send Targeted Email Campaigns

NEW QUESTION 229

Alumni Relations is using Salesforce with the Education Data Architecture (EDA). The department is holding an event that features a faculty member as the guest speaker. The events manager wants a report of all alumni who took a course from that faculty member. How should the consultant create this report?

- A. Create a custom Report Type with Courses, Course Offerings, and Course Connections.
- B. Use the Course Connections with Contact's Academic Program Report Type.
- C. Add a Course Connections cross filter to the Program Enrollments with Contact report.

Answer: A

Explanation:

The consultant should create a custom Report Type with Courses, Course Offerings, and Course Connections to create a report of all alumni who took a course from that faculty member for the Alumni Relations office that is using Salesforce with EDA. A custom Report Type is a type of report that shows information about one or more objects and their fields, filters, and relationships. A custom Report Type with Courses, Course Offerings, and Course Connections can help the Alumni Relations office create a report of all alumni who took a course from that faculty member by showing the relationship between the Contact object and the Course object through the Course Offering object and the Course Connection object. The consultant can add fields and filters to the custom Report Type to show only the alumni who took a course from that faculty member. Using the Course Connections with Contact's Academic Program Report Type, adding a Course Connections cross filter to the Program Enrollments with Contact report, or creating a custom Report Type with Contacts, Accounts, and Affiliations are not ways to create a report of all alumni who took a course from that faculty member for the Alumni Relations office that is using Salesforce with EDA. References:

? https://help.salesforce.com/s/articleView?id=sf.reports_builder_create_report_type.htm&type=5

? <https://powerofus.force.com/s/article/EDA-Course-Connections>

NEW QUESTION 234

A consultant is writing an Apex class to run when a new Contact is created in a Salesforce environment where Education Data Architecture (EDA) is in use. What should the consultant do to ensure the code executes in the order intended?

- A. Write an Apex trigger to set the order of execution.
- B. Go to EDA Settings to set the order of execution.
- C. Use Table-Driven Trigger Management (TDTM) to set the order of execution.

Answer: C

Explanation:

Table-Driven Trigger Management (TDTM) is a tool to manage the code in Salesforce and control how Apex behaves⁵. TDTM allows the consultant to easily rearrange the order of things via a table in the Salesforce interface (hence, the ??Table- Driven?? in TDTM)⁶. With TDTM, the consultant can tell the Apex trigger: do X first, then Y, then Z, without writing any code⁶. TDTM is part of the Education Data Architecture (EDA) and can be accessed from EDA Settings⁵. References:

NEW QUESTION 237

The Alumni Relations department wants to track alumni and its chapter memberships. The department wants to easily see the Primary Chapter on the Contact record. The system admin prefers to use the standard features that are available with Education Data Architecture (EDA). Which step should the consultant take to meet this requirement?

- A. Create an Affiliation mapping to the Primary Chapter field in EDA Settings.
- B. Create an Affiliation record type for Alumni Chapter and a custom field for the Primary Chapter on the Contact record.
- C. Create a custom picklist value for Alumni Chapter on the Affiliation object.

Answer: A

Explanation:

The Education Data Architecture (EDA) allows you to map fields from the Affiliation object to the Contact object, so that when an Affiliation record is created or updated, the mapped fields are automatically populated on the Contact record. This way, you can track the primary chapter of an alumni on the Contact record without creating a custom field or record type²³

NEW QUESTION 240

A consultant needs to migrate international students' contact and address information to a Salesforce Education Data Architecture (EDA) environment with the State and Country Picklist feature enabled. What should the consultant confirm before migrating the data?

- A. Contact Multi-Addresses Enabled is checked.
- B. All state and country values are ISO-3166 values.
- C. Every contact has a state and country value.

Answer: B

Explanation:

The State and Country Picklist feature in Salesforce allows users to select states and countries from predefined, standardized lists, instead of entering them manually into text fields². These picklists are based on ISO-3166 standard values, which are internationally recognized codes for identifying countries and their subdivisions. Therefore, before migrating the data, the consultant should confirm that all state and country values in the source data are ISO-3166 values, otherwise they will not match the picklist values in the target environment.

Contact Multi-Addresses Enabled is a setting in EDA that allows users to store multiple addresses for a contact, such as home, work, or mailing address. This setting does not affect the migration of state and country values, as long as they are ISO-3166 values. Every contact having a state and country value is not a requirement for the migration either, as these fields are not mandatory in EDA.

NEW QUESTION 241

A business school plans a phased Salesforce implementation for its MBA program, Executive Education, Career Advising, and ..

- * Executive Education data is largely managed in its own system
- * The MBA program is managed in a custom admission system that is integrated will the student information System (SIS)
- * Career Advising and Alumni Relations share systems with other university departments
- * The consultant has recommended a ??crawl, walk, run?? strategy

Which department should the consultant recommend for the initial ??crawl?? phase?

- A. Career Advising
- B. Executive Education
- C. MBA program

Answer: C

Explanation:

The MBA program is the best candidate for the initial ??crawl?? phase because it already has a custom admission system that is integrated with the SIS, which can be leveraged for Salesforce implementation. Executive Education data is largely managed in its own system, which may require more complex integration or migration. Career Advising and Alumni Relations share systems with other university departments, which may involve more stakeholders and dependencies.

NEW QUESTION 246

A consultant has been working with a university to build a new student services solution using Salesforce. The consultant is preparing for User Acceptance Testing.

Which item should be excluded from the testing scope?

- A. User experience in production
- B. Large data volumes
- C. Data load simulation
- D. Average versus peak performance

Answer: A

Explanation:

User experience in production should be excluded from the testing scope for User Acceptance Testing. User Acceptance Testing is a phase of testing that involves end users validating the functionality and usability of the solution in a sandbox environment that mimics the production environment. User Acceptance Testing should not include testing user experience in production, because this can affect live data and operations, and introduce errors or risks. Large data volumes, data load simulation, and average versus peak performance should be included in the testing scope for User Acceptance Testing, because they can help evaluate the performance and scalability of the solution under different scenarios and conditions. NEW QUESTION 251

A consultant is working with a university in Spain that will be using the Education Data Architecture (EDA).

Which of these considerations about translating EDA into Spanish should the consultant discuss with the university?

- A. EDA picklist values are restricted to the organization's default language.
- B. EDA picklist values for reciprocal Relationships need to be translated manually.
- C. Spanish is a platform-only language in EDA.

Answer: B

Explanation:

The consultant should discuss with the university that EDA picklist values for reciprocal Relationships need to be translated manually as a consideration about translating EDA into Spanish when using EDA. Translating EDA into Spanish means changing the language of EDA objects, fields, labels, or values into Spanish. EDA picklist values for reciprocal Relationships need to be translated manually as a consideration about translating EDA into Spanish when using EDA because these picklist values are not automatically translated by Salesforce's Translation Workbench tool and require manual intervention. The consultant should discuss with the university that EDA picklist values for reciprocal Relationships need to be translated manually as a consideration about translating EDA into Spanish when using EDA by explaining how to use custom labels or formula fields to translate these picklist values into Spanish. EDA picklist values are restricted to the organization's default language or Spanish is a platform-only language in EDA are not considerations about translating EDA into Spanish when using EDA.

NEW QUESTION 253

Recruiters want to visualize the number of prospective students at various stages in the recruitment process.

Which report chart should the consultant implement?

- A. Application Tabular report
- B. Education History dashboard
- C. Program Enrollment dashboard
- D. Opportunity Funnel report

Answer: D

Explanation:

Opportunity Funnel report is a report chart that the consultant can implement to help recruiters visualize the number of prospective students at various stages in the recruitment process. Opportunity Funnel report is a type of report that shows the distribution of Opportunities by stage, amount, or probability. Opportunity Funnel report can be used to track the progress and performance of the recruitment pipeline, and identify bottlenecks or opportunities for improvement. Application Tabular report, Education History dashboard, and Program Enrollment dashboard are not report charts that can help recruiters visualize the number of prospective students at various stages in the recruitment process. NEW QUESTION 255

The Advancement department wants to extend its Salesforce environment to support event management, including registration pages, ticketing, and agenda-building functionality.

Which solution should the consultant recommend?

- A. App on the AppExchange
- B. Elevate and Giving Pages
- C. Gift Entry Manager
- D. Event Monitoring

Answer: A

Explanation:

An app on the AppExchange is a solution that the consultant can recommend to extend the Salesforce environment to support event management functionality. The AppExchange is a marketplace where customers can find apps that provide additional features and solutions for Salesforce. There are many apps on the AppExchange that offer event management capabilities, such as registration pages, ticketing, and agenda-building. The consultant can help the Advancement

department choose an app that meets their needs and budget. Elevate and Giving Pages, Gift Entry Manager, and Event Monitoring are not solutions that can provide event management functionality. References:

NEW QUESTION 259

The Director of Advising wants to understand what students say are the most common reasons for scheduling advising appointments. What should the consultant include in a report to meet the requirement?

- A. Case Reason
- B. Appointment Topic
- C. Alert Reason

Answer: B

Explanation:

? Understanding Student Advising Reasons:

? Reporting on Appointment Topics:

? Steps to Create the Report: References:

? Salesforce Documentation: Creating Reports and Dashboards

NEW QUESTION 263

The IT administrator at a university would like to understand the Table-Driven Trigger Management (TDTM) framework in the Education Data Architecture (EDA). What is a benefit the consultant should discuss with the client?

- A. TDTM prevents custom triggers.
- B. TDTM mitigates data skew.
- C. TDTM controls the order in which operations execute.

Answer: C

Explanation:

TDTM is a framework that allows administrators to customize the behavior of Education Data Architecture (EDA) by defining triggers, classes, and custom settings². One of the benefits of TDTM is that it controls the order in which operations execute, which can improve performance and avoid conflicts or errors². For example, TDTM can ensure that account names are updated before affiliations are created, or that contact roles are deleted before opportunities are closed².
