

Fortinet

Exam Questions FCP_FGT_AD-7.6

FCP - FortiGate 7.6 Administrator

NEW QUESTION 1

What is the primary FortiGate election process when the HA override setting is enabled?

- A. Connected monitored ports > Priority > HA uptime > FortiGate serial number
- B. Connected monitored ports > Priority > System uptime > FortiGate serial number
- C. Connected monitored ports > HA uptime > Priority > FortiGate serial number
- D. Connected monitored ports > System uptime > Priority > FortiGate serial number

Answer: A

Explanation:

When HA override is enabled, FortiGate uses the following election order: number of connected monitored ports, then device priority, followed by HA uptime, and finally FortiGate serial number as a tiebreaker.

NEW QUESTION 2

Which two statements describe characteristics of automation stitches? (Choose two.)

- A. Actions involve only devices included in the Security Fabric.
- B. An automation stitch can have multiple triggers.
- C. Multiple actions can run in parallel.
- D. Triggers can involve external connectors.

Answer: CD

Explanation:

Automation stitches can execute multiple actions concurrently (in parallel).
Triggers for automation stitches can come from external connectors beyond just Fortinet devices.

NEW QUESTION 3

Refer to the exhibit.

FortiGate web filter profile configuration

Edit Web Filter Profile

Name:

Comments: 0/255

Feature set: Flow-based Proxy-based

FortiGuard Category Based Filter

Allow
Monitor
Block
Warning
Authenticate

Name	Action
Bandwidth Consuming 6	
Freeware and Software Downloads	✔ Allow
File Sharing and Storage	✔ Allow
Streaming Media and Download	✔ Allow
Peer-to-peer File Sharing	✔ Allow
Internet Radio and TV	✔ Allow
Internet Telephony	✔ Allow
Security Risk 6	
Malicious Websites	✘ Block

35% 91

The exhibit shows the FortiGuard Category Based Filter section of a corporate web filter profile.

An administrator must block access to download.com, which belongs to the Freeware and Software Downloads category. The administrator must also allow other websites in the same category.

What are two solutions for satisfying the requirement? (Choose two.)

- A. Configure a static URL filter entry for download.com with Type and Action set to Wildcard and Block, respectively.
- B. Configure a web override rating for download.com and select Malicious Websites as the subcategory.
- C. Configure a separate firewall policy with action Deny and an FQDN address object for *.download.com as destination address.
- D. Set the Freeware and Software Downloads category Action to Warning.

Answer: AC

Explanation:

Creating a static URL filter to block download.com specifically allows blocking that site without affecting the entire category.

Using a separate firewall policy with a Deny action for an FQDN address object matching download.com can also block the site while allowing others in the same category.

NEW QUESTION 4

A network administrator enabled antivirus and selected an SSL inspection profile on a firewall policy. When downloading an EICAR test file through HTTP, FortiGate detects the virus and blocks the file. When downloading the same file through HTTPS, FortiGate does not detect the virus and does not block the file, allowing it to be downloaded. The administrator confirms that the traffic matches the configured firewall policy. What are two reasons for the failed virus detection by FortiGate? (Choose two.)

- A. The selected SSL inspection profile has certificate inspection enabled.
- B. The website is exempted from SSL inspection.
- C. The EICAR test file exceeds the protocol options oversize limit.
- D. The browser does not trust the FortiGate self-signed CA certificate.

Answer: BD

NEW QUESTION 5

An administrator wanted to configure an IPS sensor to block traffic that triggers a signature set number of times during a specific time period. How can the administrator achieve the objective?

- A. Use IPS group signatures, set rate-mode 60.
- B. Use IPS packet logging option with periodical filter option.
- C. Use IPS filter, rate-mode periodical option.
- D. Use IPS filter, rate-mode periodical option.

Answer: C

Explanation:

The IPS filter with the rate-mode set to "periodical" allows the administrator to block traffic that triggers a signature a specified number of times within a defined time period, meeting the requirement.

NEW QUESTION 6

An administrator wants to analyze and manage digital certificates to prevent browser warnings when users connect to the SSL VPN portal. Which two statements describe how to correctly do this? (Choose two.)

- A. The administrator can rely on the default FortiGate self-signed certificate to prevent all security warnings in the browser.
- B. The administrator must disable HTTPS administrative access entirely to avoid certificate warnings.
- C. The administrator can use a publicly trusted certificate from a known certificate authority (CA) to stop browser warnings.
- D. The administrator can import the FortiGate self-signed certificate into each user's browser as a trusted certificate.

Answer: CD

Explanation:

Using a publicly trusted certificate from a known CA prevents browser warnings without additional user action. Importing the FortiGate self-signed certificate into users' browsers as trusted eliminates warnings caused by untrusted certificates.

NEW QUESTION 7

An administrator notices that some users are unable to establish SSL VPN connections, while others can connect without any issues. What should the administrator check first?

- A. Ensure that the affected users are using the correct port number.
- B. Ensure that user traffic is hitting the firewall policy.
- C. Ensure that forced tunneling is enabled to reroute all traffic through the SSL VPN
- D. Ensure that the HTTPS service is enabled on SSL VPN tunnel interface

Answer: B

Explanation:

If user traffic is not matching the appropriate firewall policy that permits SSL VPN, users will be unable to establish connections, making this the first aspect to verify.

NEW QUESTION 8

You have created a web filter profile named restrict_media-profile with a daily category usage quota. When you are adding the profile to the firewall policy, the restrict_media-profile is not listed in the available web profile drop down. What could be the reason?

- A. The firewall policy is in no-inspection mode instead of deep-inspection.
- B. The inspection mode in the firewall policy is not matching with web filter profile feature set.
- C. The web filter profile is already referenced in another firewall policy.
- D. The naming convention used in the web filter profile is restricting it in the firewall policy.

Answer: B

Explanation:

Web filter profiles with category usage quotas require the firewall policy to be in proxy-based (deep) inspection mode; if the inspection mode does not match this requirement, the profile will not appear in the drop-down list.

NEW QUESTION 9

Which three statements about SD-WAN performance SLAs are true? (Choose three.)

- A. They rely on session loss and jitter.
- B. They can be measured actively or passively.
- C. They are applied in a SD-WAN rule lowest cost strategy.
- D. They monitor the state of the FortiGate device.
- E. All the SLA targets can be configured.

Answer: ABE

Explanation:

SD-WAN SLAs monitor metrics like packet loss and jitter to evaluate link performance. SLA measurements can be performed using active probing or passive monitoring. Administrators can configure all SLA target parameters to define performance criteria.

NEW QUESTION 10

A network administrator is reviewing firewall policies in both Interface Pair View and By Sequence View. The policies appear in a different order in each view. Why is the policy order different in these two views?

- A. Policies in Interface Pair View are prioritized by security levels, while By Sequence View strictly follows the administrator's manual ordering.
- B. By Sequence View groups policies based on rule priority, while Interface Pair View always follows the order of traffic logs.
- C. The firewall dynamically reorders policies in Interface Pair View based on recent traffic patterns, but By Sequence View remains static.
- D. Interface Pair View sorts policies based on matching interfaces, while By Sequence View shows the actual processing order of rules.

Answer: D

Explanation:

Interface Pair View organizes policies grouped by source and destination interfaces, whereas By Sequence View displays policies in the exact order they are processed by the firewall.

NEW QUESTION 10

Refer to the exhibit.

FortiGate has two separate firewall policies for Sales and Engineering to access the same web server with the same security profiles. Which action must the administrator perform to consolidate the two policies into one?

- A. Create an Aggregate interface that includes port1 and port2 to create a single firewall policy.
- B. Select port1 and port2 subnets in a single firewall policy.
- C. Replace port1 and port2 with the any interface in a single firewall policy.
- D. Enable Multiple Interface Policies to select port1 and port2 in the same firewall policy.

Answer: D

Explanation:

Enabling Multiple Interface Policies allows you to select multiple interfaces (like port1 and port2) in a single firewall policy, consolidating access rules for both Sales and Engineering to the web server.

NEW QUESTION 11

An administrator wants to configure dead peer detection (DPD) on IPsec VPN for detecting dead tunnels. The requirement is that FortiGate sends DPD probes only when there is no inbound traffic.

Which DPD mode on FortiGate meets this requirement?

- A. Enabled
- B. On Idle
- C. Disabled
- D. On Demand

Answer: A

Explanation:

The "On Idle" DPD mode configures FortiGate to send DPD probes only when no inbound traffic is detected, meeting the requirement to send probes only when the tunnel is idle.

NEW QUESTION 16

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

FCP_FGT_AD-7.6 Practice Exam Features:

- * FCP_FGT_AD-7.6 Questions and Answers Updated Frequently
- * FCP_FGT_AD-7.6 Practice Questions Verified by Expert Senior Certified Staff
- * FCP_FGT_AD-7.6 Most Realistic Questions that Guarantee you a Pass on Your First Try
- * FCP_FGT_AD-7.6 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
