Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

NEW QUESTION 1

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Restricted SharePoint Search enables you to restrict access to Microsoft SharePoint sites without preventing users from _____ they have permission.

- administrator
- guest user
- Microsoft 365 Copilot
- Microsoft Purview eDiscovery

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Restricted SharePoint Search enables you to restrict access to Microsoft SharePoint sites without preventing users from _____ they have permission.

- administrator
- guest user
- Microsoft 365 Copilot
- Microsoft Purview eDiscovery

NEW QUESTION 2

You plan to create an agent in the Microsoft 365 Copilot app to solve a business issue. What are two reasons to create the agent? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. You need to group related chats into a Copilot notebook.
- B. You need to use a custom AI model.
- C. You need to use a custom set of instructions that differ from those of the chat experience.
- D. You need to reason over a specific website.

Answer: CD

NEW QUESTION 3

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

Answer: B

Explanation:

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations.

The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

NEW QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input checked="" type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 5

Your organization has a Microsoft 365 E5 subscription.
 You need to prevent users from sharing corporate financial data to external users. What should you use?

- A. retention labels
- B. data loss prevention (DLP) policies
- C. rote groups
- D. insider risk management policies

Answer: B

NEW QUESTION 6

Your company is piloting the use of Microsoft 365 Copilot and has purchased 100 Microsoft 365 Copilot licenses.
 You need to view detailed reports about Copilot usage in Microsoft Teams, such as meeting hours summarized by Copilot and meeting actions taken by using Copilot.
 What should you use?

- A. the Microsoft 365 Apps usage report in the Microsoft 365 admin center
- B. the Microsoft 365 Copilot readiness report in the Microsoft 365 admin center
- C. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights
- D. the Microsoft 365 Copilot usage report in the Microsoft 365 admin center

Answer: C

NEW QUESTION 7

Your organization has a Microsoft 365 subscription.
 Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.
 NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

Answer: AD

NEW QUESTION 8

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

Answer: D

Explanation:

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.

The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

NEW QUESTION 9

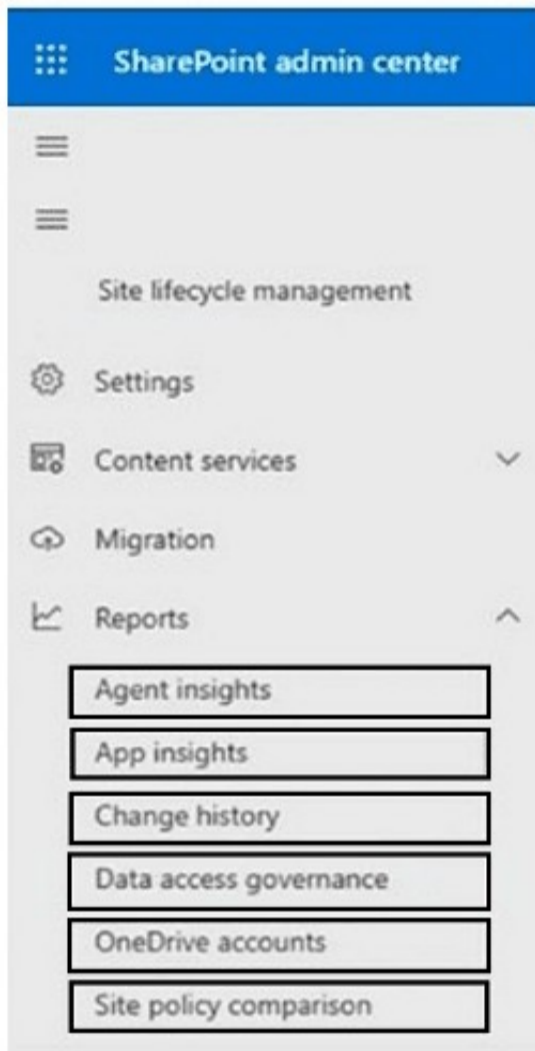

HOTSPOT

Your organization has a Microsoft 365 subscription.

You discover that Microsoft SharePoint files are being shared to users outside your organization.

You need to identify which files are being shared to the external users.

Which report should you use in the SharePoint admin center? To answer, select the appropriate report in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

adding a public DNS record.
confirming your business address.
Uploading a certificate
uploading a webpage.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input checked="" type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input checked="" type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 15

Which statement accurately describes authorization in Microsoft 365?

- A. a process to validate an identity from an external system
- B. a process to verify whether an identity is who or what they claim to be
- C. a process to verify whether an identity is allowed to access a resource
- D. a process to require additional authentication methods before an identity can access resources

Answer: C

NEW QUESTION 17

Your organization has a Microsoft 365 subscription. You create a security group named Group1 and assign a Microsoft 365 E3 license to the group. You discover that a user named User1 does NOT have access to the Microsoft 365 E3 features. You need to ensure that User1 can access all the Microsoft 365 E3 features. Which two actions can you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Add User1 to Group1.
- B. Assign a Conditional Access policy to Group1.
- C. Assign a Conditional Access policy to User1.
- D. Assign a license to User1.

Answer: AD

NEW QUESTION 22

A user named User1 is responsible for quarterly sales reporting. User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets. What should you use

- A. the Researcher agent in Microsoft 365 Copilot
- B. Microsoft 365 Copilot Search
- C. Copilot in Excel
- D. the Analyst agent in Microsoft 365 Copilot

Answer: D

NEW QUESTION 25

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

includes signals, such as collaboration history, document relevance, and document content to influence Microsoft 365 Copilot responses.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

includes signals, such as collaboration history, document relevance, and document content to influence Microsoft 365 Copilot responses.

NEW QUESTION 29

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Purview sensitivity labels can be applied to

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft Purview sensitivity labels can be applied to

Azure Blob Storage

Microsoft 365 Copilot conversations.

Microsoft SharePoint sites.

NEW QUESTION 33

You are reviewing your company's security policies as part of a Zero Trust strategy. Which statement accurately describes the Zero Trust principles?

- A. Zero Trust assumes breach and verifies each request.
- B. Zero Trust enhances the user experience by minimizing authentication prompts.
- C. Zero Trust removes the need to regularly review and adjust access permissions.
- D. Zero Trust treats all requests from your corporate network as trustworthy.

Answer: A

NEW QUESTION 34

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 35

Your organization has a Microsoft 365 subscription.

You need to review the impact of a recent phishing incident that targeted email users. What should you use?

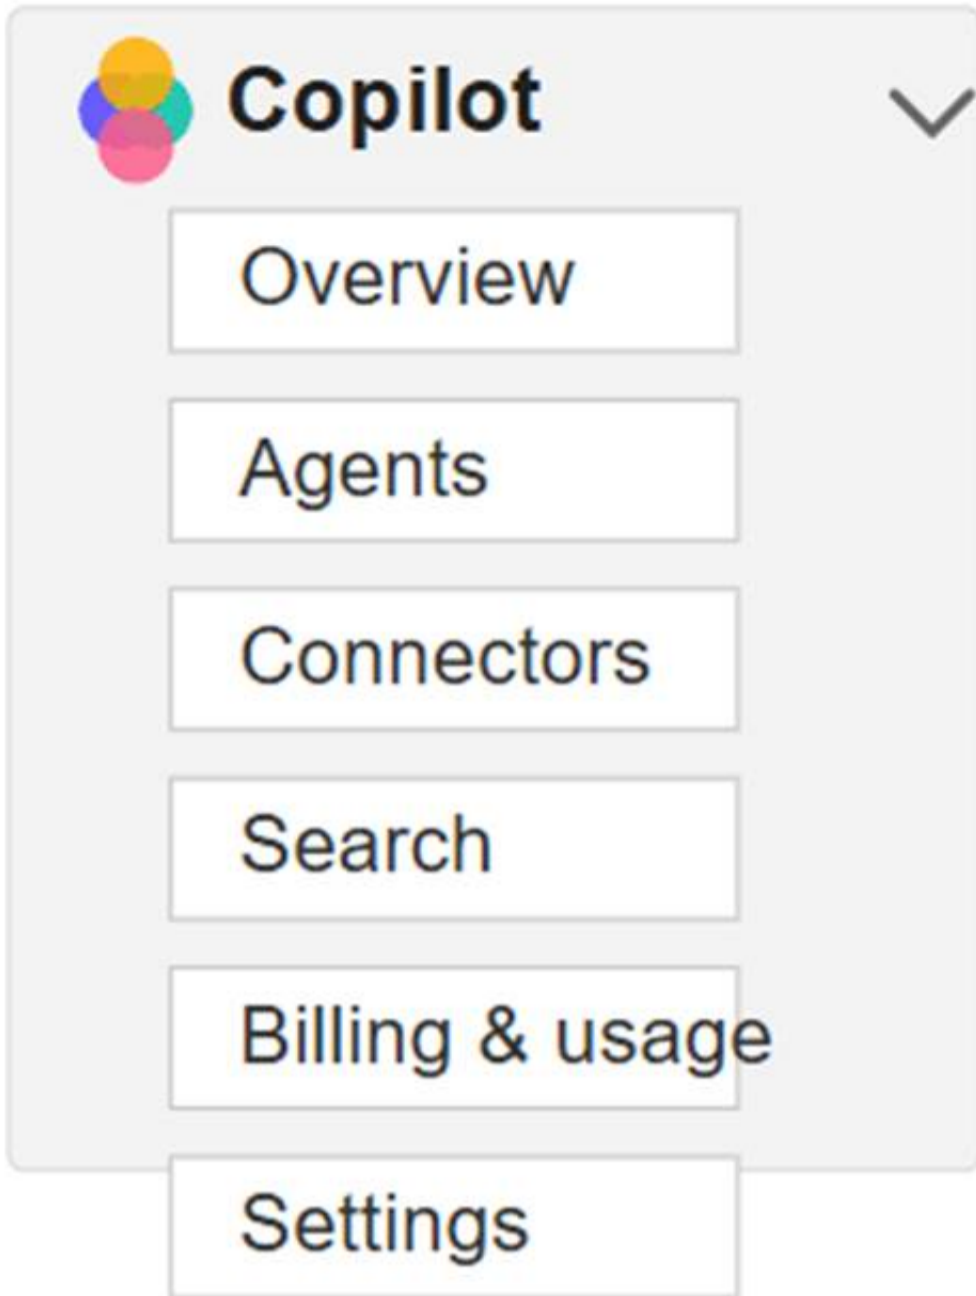

- A. the Microsoft Defender portal
- B. the Microsoft 365 admin center
- C. the Microsoft Entra admin center
- D. the Microsoft Exchange admin center

Answer: A

NEW QUESTION 40

HOTSPOT

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is Connectors. Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems. Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center, and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents. This is why the hotspot in the Copilot area should be set to Connectors, not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors. Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

NEW QUESTION 44

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a

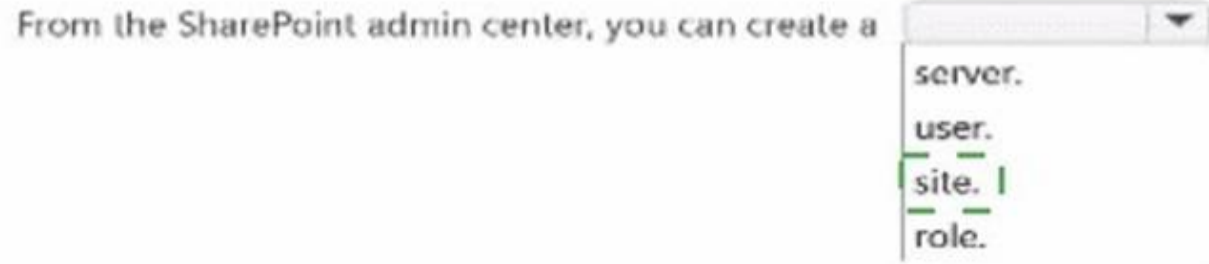

- server.
- user.
- site.
- role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 49

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	<input type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	<input type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 53

HOTSPOT

Your organization has a Microsoft 365 subscription that contains a Microsoft SharePoint site named Site1. The permissions for Site1 are configured as shown in the exhibit.

You create a new user named User1 in the subscription.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

User1 is a site member of Site1.

Permissions

Manage who has access to this site.
