Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

NEW QUESTION 1

HOTSPOT

A user named User5 navigates to <https://myapps.microsoft.com>. After entering their username and password, User5 receives the displayed message on their mobile device.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using  for multifactor authentication (MFA).

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

 Are you trying to sign in?

Contoso Ltd.
 User5@sk2508.onmicrosoft.com

Enter the number shown to sign in.

Enter number here

YES

NO, IT'S NOT ME

I CAN'T SEE THE NUMBER

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using

email OTP
 the Microsoft Authenticator app
 SMS
 a Temporary Access Pass

 for multifactor authentication (MFA).

NEW QUESTION 2

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Restricted SharePoint Search enables you to restrict access to Microsoft SharePoint sites without preventing users from

administrator
 guest user
 Microsoft 365 Copilot
 Microsoft Purview eDiscovery

 they have permission.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Restricted SharePoint Search enables you to restrict access to Microsoft SharePoint sites without preventing users from

administrator
 guest user
 Microsoft 365 Copilot
 Microsoft Purview eDiscovery

 they have permission.

NEW QUESTION 3

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

Answer: C

Explanation:

The correct answer is C. the code interpreter capability. Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations. Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook. Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis, statistical computations, and generating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION 4

HOTSPOT

You want to view the administrative actions taken by a service administrator in Microsoft 365. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	☐	☐
You can use Audit in the Microsoft Defender portal.	☐	☐
You can use Audit in the Microsoft Purview portal.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	☐	☒
You can use Audit in the Microsoft Defender portal.	☒	☐
You can use Audit in the Microsoft Purview portal.	☒	☐

NEW QUESTION 5

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

Answer: B

Explanation:

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations. The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer

is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

NEW QUESTION 6

Your organization has a Microsoft 365 subscription.
You need to investigate security incidents and alerts raised from the Windows 11 devices in your organization. What should you use?

- A. Microsoft Entra ID Protection
- B. Microsoft Purview Insider Risk Management
- C. Microsoft Defender for Endpoint
- D. Microsoft Defender for Identity

Answer: C

NEW QUESTION 7

HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	☐	☐
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	☐	☐
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	☐	☒
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	☒	☐
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	☒	☐

NEW QUESTION 8

HOTSPOT
Your organization has a Microsoft 365 subscription.
You need to use Microsoft Purview to meet the following requirements:
Prevent users from sharing files that contain Personally Identifiable Information (PII). Use machine learning to train a model that detects sensitive content.
Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Prevent users from sharing PII:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

Use machine learning to train a model:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Prevent users from sharing PII:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

Use machine learning to train a model:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

NEW QUESTION 9

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

Answer: A

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	☐	☐
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	☐	☐
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	☐	☒
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	☒	☐
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	☐	☒

NEW QUESTION 10

Your organization has a Microsoft 365 subscription. All users have Microsoft 365 Copilot licenses. You need to identify where sensitive content is being used during Copilot interactions, analyze the content usage patterns, and provide recommendations on applying the appropriate protections. What should you use?

- A. Microsoft Viva Insights
- B. the Microsoft Purview DSPM for AI solution
- C. Microsoft Security Copilot
- D. the Microsoft Purview Insider Risk Management solution

Answer: B

NEW QUESTION 11

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer isD. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself doesn't make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files. The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

NEW QUESTION 15

Your organization has a Microsoft 365 subscription that contains a user named User1. User1 plans to leave your company in two weeks. You need to capture the activity of User1 to identify whether the user is exfiltrating data. Which Microsoft Purview solution should you use?

- A. Communication Compliance
- B. Data Security Posture Management
- C. Insider Risk Management
- D. Data Lifecycle Management

Answer: C

NEW QUESTION 18

You use Microsoft 365 Copilot.

What does Copilot use to generate responses based on corporate data stored in Microsoft SharePoint?

- A. Microsoft Intune
- B. Microsoft Defender
- C. Microsoft Graph
- D. Microsoft Purview

Answer: C
