Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

<https://www.certleader.com/AB-900-dumps.html>

NEW QUESTION 1

Your company requires that all Microsoft SharePoint sites have a minimum of two owners. You need to ensure that sites that have less than two owners are marked as read-only if the sites are NOT remediated. What should you configure in the SharePoint admin center?

- A. Site-level access restriction
- B. Data access governance reports
- C. Site lifecycle management
- D. Block download policy for SharePoint and OneDrive

Answer: C

NEW QUESTION 2

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

Answer: C

Explanation:

The correct answer is C. the code interpreter capability. Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations. Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook. Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis, statistical computations, and generating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION 3

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	☐	☐
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	☐	☐
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	☒	☐
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	☒	☐
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	☒	☐

NEW QUESTION 4

HOTSPOT

Select the answer that correctly completes the sentence.

Microsoft Entra Privileged Identity Management (PIM) provides time-bound role activation.

Microsoft Entra Privileged Identity Management (PIM) provides

- restricted access to Microsoft 365 services.
- the lifecycle management of users.
- the management of enterprise applications.
- time-bound role activation.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Entra Privileged Identity Management (PIM) provides

- restricted access to Microsoft 365 services.
- the lifecycle management of users.
- the management of enterprise applications.
- time-bound role activation.

NEW QUESTION 5

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

- Activate the role
- install the Microsoft Authenticator app.
- request a license.
- update your location information.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

- Activate the role
- install the Microsoft Authenticator app.
- request a license.
- update your location information.

NEW QUESTION 6

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

Answer: A

NEW QUESTION 7

Your organization has a Microsoft 365 subscription.
Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

Answer: AD

NEW QUESTION 8

HOTSPOT
Select the answer that correctly completes the sentence.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☐

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☒
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☒
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☒	☐

NEW QUESTION 9

Your organization has a Microsoft 365 E5 subscription.
You need to ensure that a third-party cloud service can authenticate to Microsoft Entra. What should you configure?

- A. a Microsoft 365 Copilot connector
- B. multifactor authentication (MFA)
- C. a Conditional Access policy
- D. an app registration

Answer: D

NEW QUESTION 10

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer isD. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself doesnotmake it available to users. Microsoft Learn states that after you create sensitivity labels, you mustpublishthem by creating alabel policyso that users and groups can see and apply those labels in Microsoft 365

apps and services. Publishing controls which labels are available and to whom they are shown. This is why asensitivity label policyis required to ensure that users can applyLabel1to files.
The other options do not meet the requirement.Auto-labeling policiesapply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. Atrainable classifieris used to identify content categories, not to publish a label. Aretention label policypublishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using asensitivity label policy.

NEW QUESTION 10

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Purview sensitivity labels can be applied to

Azure Blob Storage

Microsoft 365 Copilot conversations.

Microsoft SharePoint sites.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft Purview sensitivity labels can be applied to

Azure Blob Storage

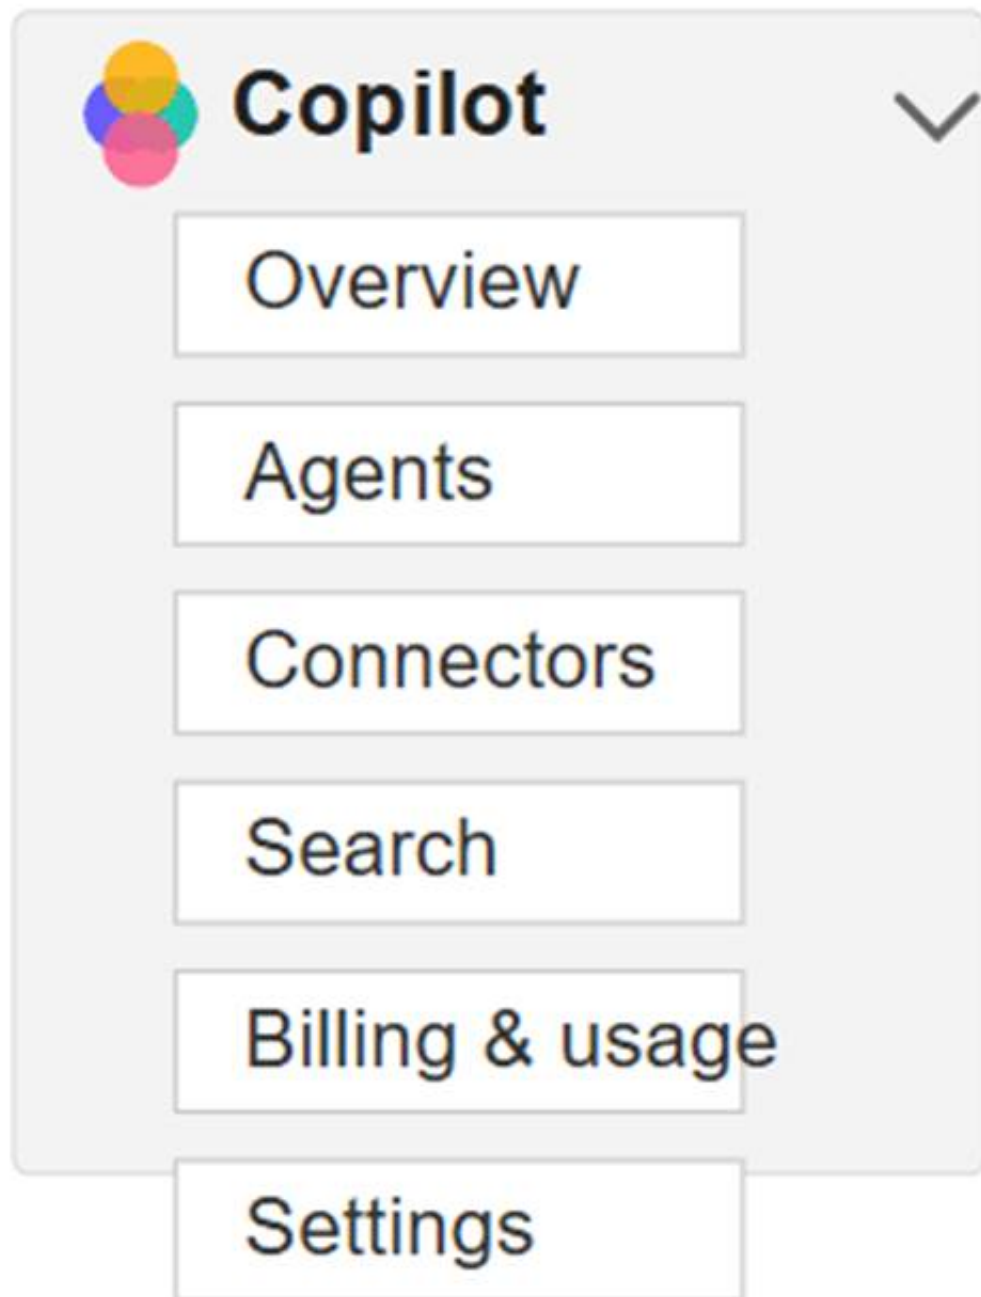

Microsoft 365 Copilot conversations.

Microsoft SharePoint sites.

NEW QUESTION 12

HOTSPOT

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is Connectors. Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems. Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center, and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents.

This is why the hotspot in the Copilot area should be set to Connectors, not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors. Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

NEW QUESTION 13

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a

server.
user.
site.
role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

From the SharePoint admin center, you can create a

server.
user.
site. |
role.

NEW QUESTION 14

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	☐	☐
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	☐	☐
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	☒	☐
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	☒	☐
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	☐	☒

NEW QUESTION 16

HOTSPOT

Your organization has a Microsoft 365 subscription.

A user named John is assigned an admin role as shown in the following exhibit.

Manage admin roles

John selected

Admin roles give users permission to view data and complete tasks in admin centers. Give users only the access they need by assigning the least-permissive role.

[Learn more about admin roles](#)

☐ User (no admin center access)

☒ Admin center access

Global readers have read-only access to admin centers, while Global admins have unlimited access to edit all settings. Users assigned other roles are more limited in what they can see and do.

☒ Global Reader ⓘ

☐ AI Administrator ⓘ

☐ Exchange Administrator ⓘ

☐ Global Administrator ⓘ

☐ Helpdesk Administrator ⓘ

☐ Service Support Administrator ⓘ

☐ SharePoint Administrator ⓘ

☐ User Administrator ⓘ

☐ User Experience Success Manager ⓘ

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

John can [answer choice].

View all the users in the Microsoft Entra tenant

view all the content in Microsoft SharePoint sites

read all the content in Microsoft Exchange mailboxes

perform eDiscovery of Microsoft 365 Copilot prompts

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is View all the users in the Microsoft Entra tenant. In the exhibit, John is assigned the Global Reader role. Microsoft documents that the Global Reader role is intended for users who need to view administrator features and settings in admin centers that a Global Administrator can view, but without edit permissions. That makes it appropriate for read-only visibility into tenant-wide directory and admin information, including users in Microsoft Entra. The other answer choices are not supported by the Global Reader role. Microsoft distinguishes admin-center visibility from access to content in workloads such as SharePoint sites and Exchange mailboxes. Global Reader is a read-only administrative role, not a content access role for reading all documents or mailbox items. Likewise, performing eDiscovery of Microsoft 365 Copilot prompts requires Purview eDiscovery permissions or role group membership, not merely the Global Reader role. Microsoft documents eDiscovery permissions separately in Purview role groups. Therefore, based on the assigned role shown, the valid completion is that John can view all the users in the Microsoft Entra tenant.

NEW QUESTION 17

Your organization has a Microsoft 365 subscription.
You need to evaluate your organization's Identity Secure Score.
Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

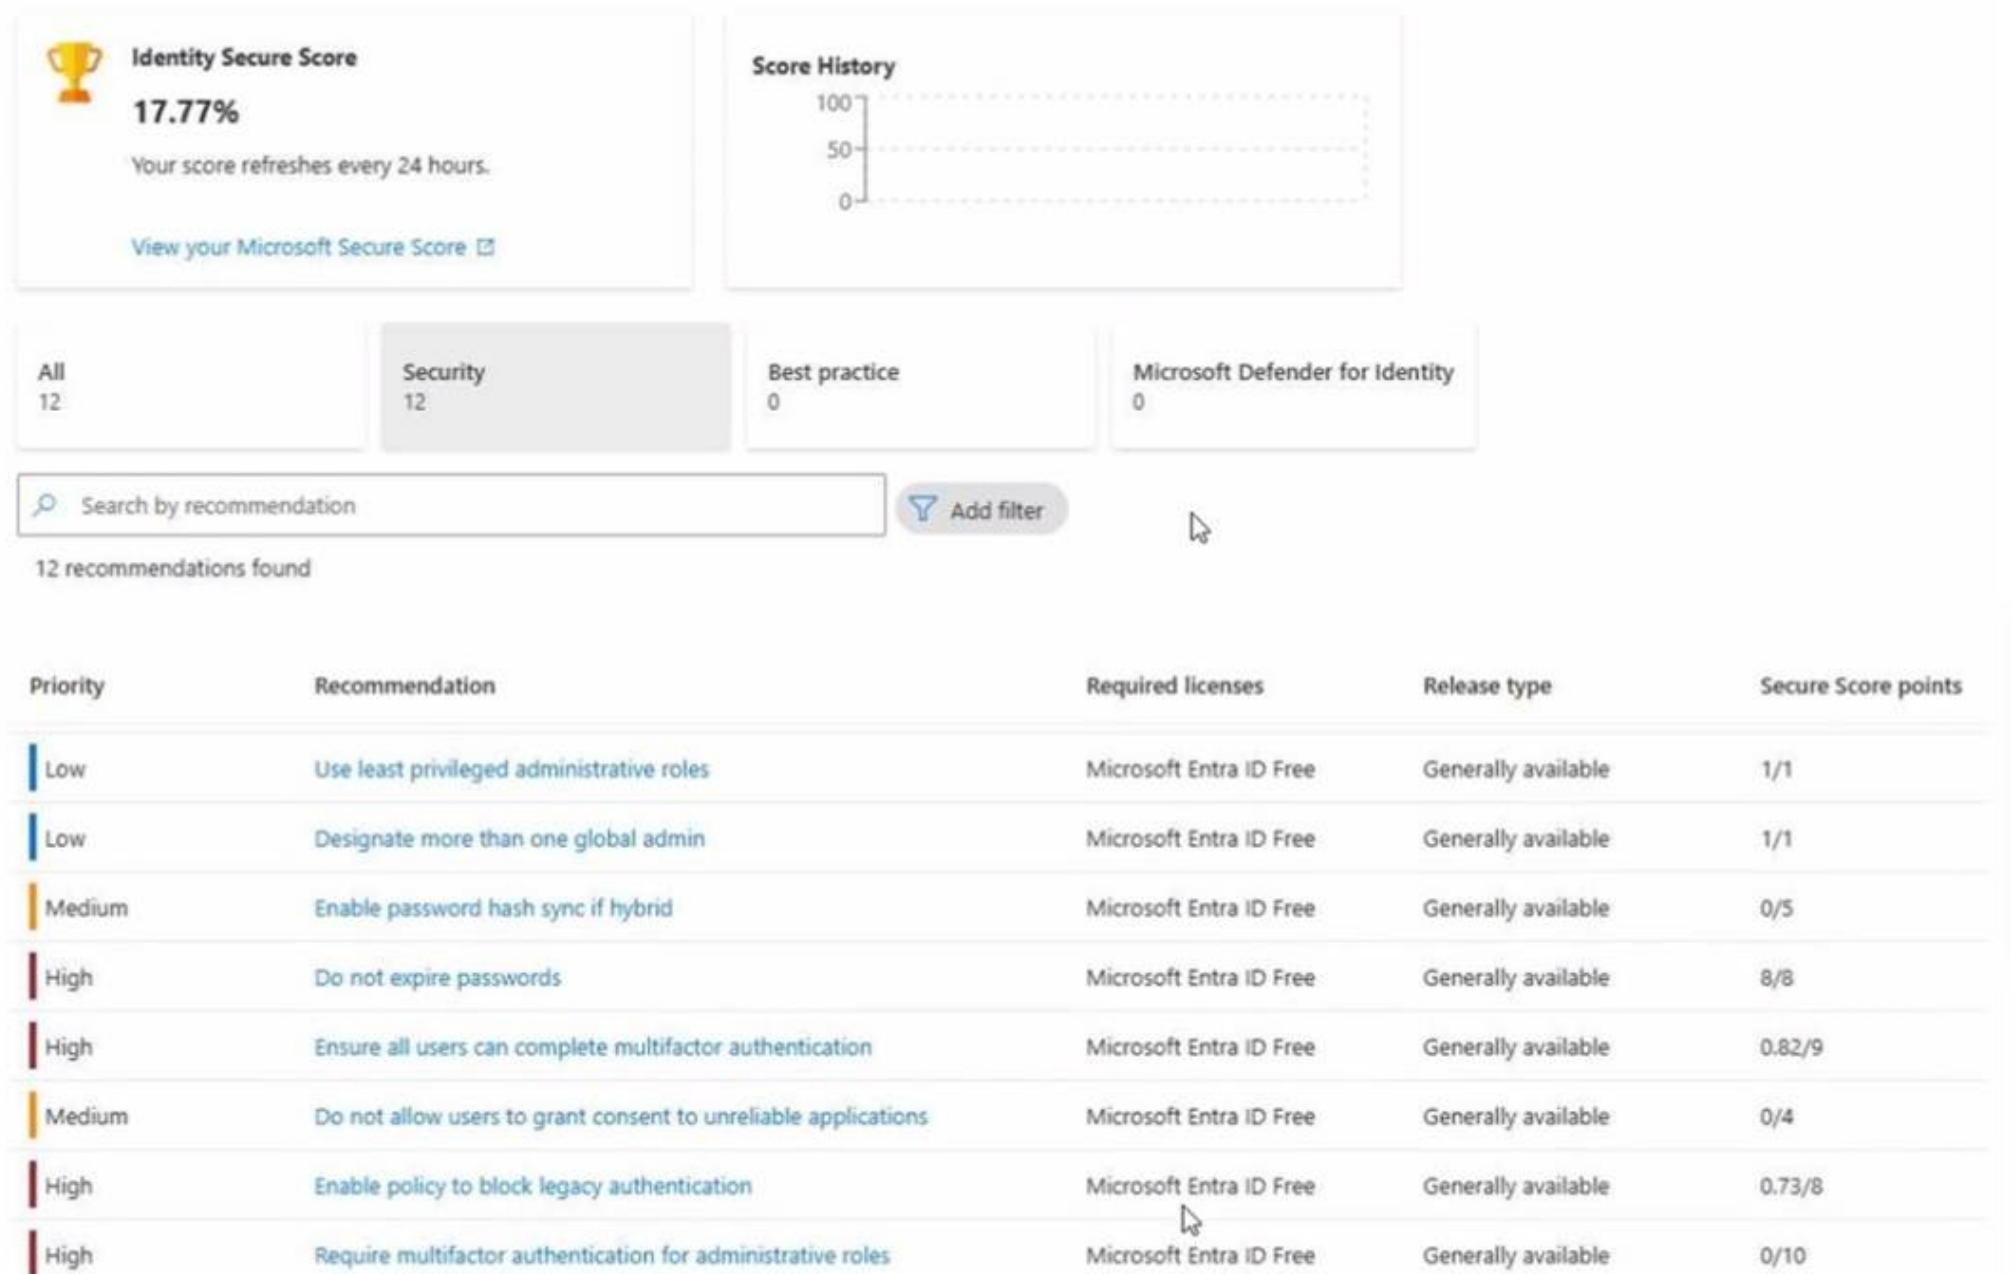

- A. the number of global administrators
- B. the SharePoint site permissions
- C. the location of the users
- D. passwords that are never expired

Answer: AD

NEW QUESTION 20

HOTSPOT

You open the Microsoft Entra admin center as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

NEW QUESTION 25

HOTSPOT

Your company uses Microsoft 365 Copilot pay-as-you-go billing.

The company wants greater visibility into Copilot usage costs and the ability to forecast departmental spending.

You need to ensure that you can see Copilot costs by department.
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft Entra admin center

The Microsoft Purview portal

Feature:

An auto-claim policy

A billing policy

A Copilot connector

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft Entra admin center

The Microsoft Purview portal

Feature:

An auto-claim policy

A billing policy

A Copilot connector

NEW QUESTION 30

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	☐	☐
Microsoft Defender for Identity monitors identities in Active Directory domains.	☐	☐
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	☐	☐

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	☒	☐
Microsoft Defender for Identity monitors identities in Active Directory domains.	☒	☐
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	☐	☒
